HUSSARS, Hungarian militia, provided by the landholders; instituted by Matthias Corvinus, about 1359. (Hussar is derived from huss, 20; and ar, price.) The British Hussars were enrolled in 1759.

HUSSITES. After the death of Huss, many of his followers took up arms, in 1419, and formed political party under John Ziska, and built the city of Tabor. He defeated the emperor Sigismond, 11 July, 1420, and a short truce followed. Ziska, blinded at the siege of Rabi, beat all the armies sent against him. He died of the plague, 18 Oct. 1424, and is said to have ordered a drum to be made of his skin to terrify his enemies even after death. Two Hussite generals, named Procopius, defeated the imperialists in 1431; and a temporary peace ensued. Divisions took place among the Hussites, and on 30 May, 1434, they were defeated, and Procopius the elder slain at Bömischbrod or Lippau. Toleration was granted by the treaty of Iglau, and Sigismond entered Prague 23 Aug. 1436. The Hussites opposed his successor, Albert of Austria, and called Casimir of Poland to the throne; but were defeated in 1438. A portion of the Hussites existed in the time of Luther, and were called "Bohemian brethren."

Winchester, Lincoln, York, &c., were also granted hustings courts.

HUTCHINSONIANS included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson, of Yorkshire (1674-1737); they rejected the Newtonian system, and contended that the scriptures contain a complete system of natural philosophy. His work, 'Mosce' Principia,' was published in 1724. He derived all things from the air, whence, he said, proceeded fire, light, and spirit, types of the Trinity. In 1712 he invented a time-piece for finding the longitude. He died in 1737.

HYDROCHLORIC ACID or CHLORHYD-RIC ACID, the only known compound of chlorine and hydrogen, was discovered by Dr. Priestley, 1772; its constitution determined by Davy. 1810. It is its constitution determined by Davy, 1810. It is also called muriatic acid and spirit of salt; see

HYDROGEN (from hydör, water). Paracelsus observed a gas rise from a solution of iron in oil of vitriol, about 1500; Turquet de Mayerne discovered its inflammability, 1656; as did Boyle, 1672; Lemery noticed its detonating power, 1700. In 1766 Cavendish proved it to be an elementary body; and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced; subsequently lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflam-mable air." One volume of oxygen combines with One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state. It was liquened by Raoul Pictet and Cailletet, end of 1877.

HYDROGENTUM, a hypothetical metal. In a paper read before the Royal Society, 7 Jan. 1869, Mr. Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium.

INDEMNITY BILL, by which the minister

of the crown or the government is relieved from the responsibility of measures adopted in extreme and urgent cases, without the previous sanction of parliament. One was passed 19 April, 1801; another to indemnify ministers against their acts during the suspension of the *Habeas Corpus* act, was carried in the commons (principal divisions, 190 to 64); and in the lords (93 to 27), 10 March, 1818. In 1848 and 1857, bills of indemnity were passed for the suspension of the Bank Charter act by the ministry; see Oblivion. An indemnity bill is passed at the end of every session of parliament for persons who transgress through ignorance of the law. The practice began in 1715.

INDEPENDENCE, DECLARATION of, by United States of North America, 4 July, 1776, is annually celebrated.

INDEPENDENTS or Congregational-18TS, hold that each church or congregation is independent of all others in religious matters; that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed; and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown presched these doctrines about 1585, but, after 32 imprisonments, he eventually conformed to the established church. A church was formed in London in 1593, when there were 20,000 independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of Independency. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an independent, obtained them toleration, in opposition to the Presbyterians. The independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the congregational union of England and Wales formed in 1831, published their "declaration of faith, order, and discipline," in 1833. In 1851 they had 3244 chapels for 1,067,760 persons in England and Wales; in 1887, the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of gregationalists had 4,338 churches and mission stations; see Worship. INDEXES OF PROHIBITED BOOKS. The Index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595.

It was partially conquered by Darius Hystasses, who formed an Indian satrapy, in 512 B.C., and by Alerander, 327 B.C., and subsequently the intercourse between India and the Roman empire was much increased. The authentic history of Hindostan commences with the conquest of Mahmud Ghumi 1004. Rennell. See Secretaries, Bengal, Bombay, Calcutta, Madras, and Oude, for further details. INDIA COMPANY, EAST. The first commercial intercourse of the English with the East Indies was a private adventure of three ships fitted out in 1591. Only one of them reached India; and, after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized his own; but his information gave rise to a mercantile voyage, and the establishment of a company, whose first charter, in Dec. 1600, was renewed in 1609, 1657, 1661, 1693, and 1744. Its stock in 1600 consisted of 72,000l., when it fitted out four ships. Meeting with success, it continued to trade, and India stock sold at 500l. for a share of 100l. in 1683.

A new company (the "English") was chartered 5 Sept. 1698, and the old (the "London") suspended from trading f r three years; the two were united 1702 New East India company established 1708 Privileges of the company continued till 1783. 1744

Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha i Jan. 313. It was first used by the Latin church in 342.

INDIGO, the dye obtained from the woad plant, isatis tinctoria, was used by the Egyptians, and other ancient nations; and the processes are described by Pliny. After the passage of the Cape of Good Hope, in 1497, it was gradually superseded by the eastern indigo, got from the indigofera. The mention of indigo occurs in English statutes in 1581. INDUCTION of electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorf's magneto-electric induction coil was constructed in 1850. See under Electricity.

INDUCTIVE PHILOSOPHY, based on the results of observations and experiments, really common sense, is especially expounded by Bacon in the second book of his "Novum Organon," published 1620.

INDULGENCES in the early church were the moderation of ecclesiastical punishment. The papal system for the absolute pardon of sin, commenced by Leo. III. about 800, were granted in the 11th century by Gregory VII., and by Urban II, and by others, in the 12th century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In who made public sale of indulgences, 1313. The doctrine was much opposed in Germany, and led to the constitution of the church named "Old Catholics," vohich see. INFANTICIDE, especially female, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it is now gradually decreasing in India. On 12 Nov. 1851, Mr. Raikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, 14 Nov. 1853. Much suspicion was caused in London in 1867 through the deaths of children farmed out, or given up to persons advertising for children to adopt, with a premium. The agitation revived, June, 1870. Margaret Waters was convicted of the murder of John Cowen, an illegitimate infant, by poison and neglect, 23 Sept. 1870. She had adopted about 40 children, receiving a few pounds as premium; in four years, many had died. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment which is termed the 100th. The number, now 109, includes the nine regiments formerly in the pay of the East India company, and several colonial corps. INFIRMARIES. Ancient Rome had no houses for the cure of the sick; diseased persons were carried to the temple of Esculapius for cure. Institutions for the accommodation of travellers, the indigent, and sick were founded by the emperor Julian about 362; and infirmaries or hospitals were frequently built to cathedrals and monasteries. The emperor Louis II. caused infirmaries situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. Beckmann; see Hospitals.

INGOUR, a river rising in the Caucasus and falling into the Black Sea. Omar Pasha, marching to the relief of Kars, crossed this river on 6 Nov. 1855, with 10,000 men, and attacked the Russians, 12,000 strong, who, after a struggle, retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

INK. The ancient black inks were composed of soot and ivory black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colours, as red, gold, silver, and purple. Red ink was made of vermilion and gum. Indian ink was brought from China, and must have been in use by the people of the east from the earliest ages. INISIBLE, or SYMPATHETIC INKS, were known at early periods. Ovid (A.D. 2) teaches young women to write with new milk. Receipts for preparing invisible ink were given by Peter Borel, in 1653, and by Le Mort, in 1669. Beckmann.

INKERMANN (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the grandduke Michael and Nicholas, attacked the British (800) near the old fort of Inkermann, before daybreak, 5 Nov. 1854. They were kept at bay for six hours till the arrival of 6000 French. The Russians were then repulsed, leaving 9000 killed and wounded. The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathoart, and generals Strangways, Goldie, and Torrens, were among the slain. On 15 Nov. 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inkermann, and caused great loss of life.

Much fighting took place in 1809, and Innsbrück changed masters several times, being finally taken by the Austrians, 12 Aug. The emperor Francis Joseph met queen Victoria here, 23 April, 1888.

INOCULATION, see Small Pox. Lady Mary Wortley Montagu introduced inoculation from small pox to England from Turkey. In 1718 she had her son inoculated at Adrianople with success. She was allowed to have it first tried in England on seven condemned criminals, 1721; and in 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and clergy until 1760. Dr. Mead practised inoculation clergy until 1700. Dr. mean practised inculation very successfully up to 1754, and Dr. Dimsdale of London, inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-99, only three died. An inoculation hospital was established in 1746. Vaccine inoculation was introduced by Dr. Jenner, 21 Jan. 1799; he had discovered its virtue in 1796, and had been making according to the intermediate three years. experiments during the intermediate three years. Inoculation was forbidden by law in 1840. See Vaccination, Sheep, and Hydrophobia.

INQUESTS, see Coroner.

INQUISITION or HOLY OFFICE. vious to Constantine (306), hereey and spiritual offences were punished by excommunication only; but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382. Priscillian was put to death in 384 by the emperor Maximus. Justinian decreed the doctrine of the four holy synods as to the holy scriptures and their canons to be observed as laws, 529; hence the penal code against heretics. About 800 the power of the western bishops was enlarged, and courts were established for trying and punishing spiritual offenders, even with death; the punishment being termed in Spain auto-da-fé, "an act of faith." In the 12th century many heresies arose, and during the crusades against the Albigenses, Gregory IX., in 1233, established by rules the inquisitorial missions sent out by Innocent III., 1210-15, and committed them to the Dominicans. Pietro da Verona (styled Peter Martyr), the first inquisitor who burnt heretics, assassinated by an accused gonfalonier, 6 April, 1252, was canonized.

See Entomology.

INSOLVENCY. The first insolvent act was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act, was taken in England by 50,733 insolvents from the time of its passing in 1814, to March, 1827, a period of thirteen years. Since then the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300%, might petition the court of bankruptcy, and propose compositions, and have pro tem protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by a new bank-ruptcy act, the business of the insolvent debtors court was transferred to the court of bankruptcy and a number of imprisoned debtors were released in Nov. 1861. INTERDICT or ECCLESIASTICAL CEN-SURE, seldom decreed in Europe till the time of Gregory VII. 1073, but often afterwards. When a prince was excommunicated, all his subjects retaining their allegiance were excommunicated also, and the clergy were forbidden to perform any part of divine service, or any clerical duties, sare the baptism of infants, and taking the confessions of dying penitents. In 1170, pope Alexander put all England under an interdict; and when king John was excommunicated in 1208, the kingdom lay under a papal interdict for six years. England was put under an interdict, on Henry VIII. shaking of the pope's supremacy, 1535; and pope Sixts Y published a crusade against queen Elizabeth of England in 1588; see Excommunication.

INTEREST, see Usury. The word interest was first used in an act of parliament of the 21st James I. 1623, wherein it was made to signify a lawful increase by way of compensation for the use of money lent. The rate fixed by the act was 8/. for the use of 100% for a year, in place of usury at 10% before taken. The Commonwealth lowered the rate to 61. in 1651; confirmed in 1660; and by an act of the 13th of queen Anne, 1713, it was reduced to 5/. The restraint being found prejudicial to commerce, it was totally removed by 17 & 18 Vict. c. 90 (1854).

INVENTORS' INSTITUTE, established in May, 1862; first president, sir David Brewster.

INVERARY, Argyllshire, made a royal burgh, 1648. The duke of Argyll's castle, rebuilt by Adam, 1745-8, was greatly injured by fire, 12 Oct. 1877.

INVERNESS (N.W. Scotland), a city of the Picts up to 843. It was taken by Edward I.; retaken by Bruce, 1313; burnt by the lord of the isles, 1411; taken by Cromwell, 1649; and by prince Charles Edward in 1746. He was totally defeated at Culloden, about five miles from Inverness, 16 April, 1746.

INVESTIGATION. See Delicate.

INVESTITURE OF ECCLESIASTICS, was a cause of discord between the pope and temporal sovereigns in the middle ages; and led to actual war between Gregory VII. and the emperor Henry IV. 1075-1085. The pope endeavoured to deprive the sovereign of the right of nominating biahops and abbota, and of investing them with the cross and ring. Henry V. gave up the right, by treaty, Feb. IIII; but other sovereigns resolutely refused to concede it.

INVINCIBLE ARMADA or SPANISH ARMADA, see Armada.

INVINCIBLES, IRISH, see Irish Invincibles, Femians and Ireland, 1882-3.

INVOCATION OF THE VIRGIN AND SAINTS to intercede with God. This practice of the Romish church has been traced to the time of Gregory the Great, 593. The Eastern church began (in the 5th century) by calling upon the dead, and demanding their suffrage as present in the divine offices.

IODINE (from the Greek iodes, violet-like), was discovered by M. De Courtois, a manufacturer of saltpetre at Paris in 1812, and investigated by M. Clement, 1813. On the application of heat it rises in the form of a dense violet-coloured vapour, easily evaporates, and melts at 220 degrees: it changes vegetable blues to yellow, and a seven-thousandth part converts water to a deep yellow colour, and starch into a purple.

IONA, ICOLMKILL, or Hin, one of the Hebrides. About 565 St. Columba founded a monastery here, which flourished till the 8th and oth centuries, when it was frequently ravaged by the Norsemen. Other religious bodies afterwards were formed here, and the isle was long esteemed aacred.

IONIA (Asia Minor). About 1040 B.C. the Iones, a Pelasgic race, emigrated from Greece, and settled here and on the adjoining islands. They built Ephesus, Smyrna, and other noble cities. They were conquered by the great Cyrus about 548 B.c.; revolted 504, but were again subdued. After the victories of Cimon, Ionia became independent and remained so till 387, when it was once more subjected to Persia. It formed part of the dominions of Alexander and his successors; was annexed to Turks.—Ionia was renowned for poets, historians, and philosophers. The "Antiquities of Ionia," were published by Chandler, Rovett, and Pars, 1769-1840, and the Dilettanti Society, 1840-1881.

IONIAN ISLANDS (on W. coast of Greece). Corfu, the capital, Cephalonia, Zante, Ithaca, Santa Maura, Cerigo, and Paxo. They were colonised by the Iones, and partock of the fortunes of the Greek people; were subject to Naples in the 13th century, and in the 14th to Venice.

IONIC ORDER OF ARCHITECTURE, an improvement on the Doric, was invented by the Ionians about 1350 B.C. Vitruvius. Its distinguishing characters are the slenderness and flutings of its columns, and the volutes of rams' horns that adorn the capital.

IONIC SECT OF PHILOSOPHERS, founded by Thales of Miletus about 600 B.C. distinguished for its abstruse speculations under his successors and pupils, Anaximander, Anaximenes, Anaxagoras, and Archelaus, the master of Socrates. They held that the world is a living being, and that water is the origin of all things.

IOWA, a western state of North America, was organised as a territory 12 June, 1838; and admitted into the Union, 28 Dec. 1846. Capital, Des Moines. Population, 1880, 1,624,615.

IPSUS (Phrygia), BATTLE OF, Aug. 301 B.c. when Seleuous was confirmed in his kingdom of Syria by the defeat and death of Antigonus, king of Asia. The latter led into the field an army of about 70,000 foot, and 10,000 horse, with 75 ele-phants. The former had 64,000 infantry, besides 10,500 horse, 400 elephants, and 120 armed chariots. Plutarch.

IPSWICH (Suffolk), the Saxon Gippeswic, was ravaged by the Danea, 991 and 1000. Wolsey was born here, 1471; and founded a school in 1525. The port was greatly improved by the erection of wet docks, 1837-42. The railway to London was opened 25 June, 1846; and the new town-hall, 29 Jan. 1868. New corn exchange opened, 26 July, 1882.

IRELAND, anciently named Eri or Eris, Ierne and Hibernia, is said to have been first colonised by Phœnicians. Some assert that Partholani landed in Ireland about 2048 B.C.; that the descent of the Damnonii was made about 1463 B.C.; and that this was followed by the descent of Heber and Heremon, Milesian princes, from Galicia, in Spain, who conquered Ireland, and gave to its throne a race of 171 kings. One of the finest, thickest, and heaviest armour-plates ever rolled in the world was pressed into the very perfection of a manufactured armour-plate at the great Atlas Ironworks of sir John Brown and Co., Sheffield. The size of it when in the furnace was a little over 20 feet long by about 4 feet broad and 21 inches thick. Its rough weight was over 22 tons. It was built up in the furnace before being rolled by five mould plates, each 3 inches thick, and one solid plate of 6 inches. This mass when reduced by intense heat to the consistency of dough, was withdrawn from the furnace, and in the course of less than a quarter of an hour was passed between the enormous rollers many times, was reduced to a compact slab of iron of a uniform thickness of 15 inches, and then passed on to its bed to cool till fit for having its rough edges planed down to the proper dimensions, 6 Sept. 1867. ITALIAN REPUBLIC was the name given to the remodelled Cisalpine republic. Napoleon Bonaparte, president, Jan. 1802.

The history of Italy is soon absorbed into that of Rome, founded 753 B.C. ITHACA, kingdom of Ulysses, see Ionian Isles. It was explored by Dr. Schliemann, in 1878; few discoveries being made.

ITINERARIES. The Roman Itinerarium was a table of the stages between important places. The "Itineraria Antonini," embracing the whole Roman empire, usually ascribed to the emperor Aurelius Antonius, and his successors, A.D. 138-180, was probably based upon the survey made by order of Julius Cessar, 44 B.C. The "Itinerarium Hierosolymitanum" was drawn up for the use of the pilgrims about A.D. 333.

IVORY was brought to Solomon from Tambih, about 992 B.C. (1 Kings x. 22). The colomal status of Jupiter, Minerva, &c., by Phidias, were formed of ivory and gold, 444 B.C. Ivory task, 7 feet long, sent by the Zulu king Cetywayo to lord Chelmsford, as a token of peace, summer, 1879.

IVRY (near Evreux, N.W. France). Here Henry IV. totally defeated the duc de Mayenne, and the League army, 14 March, 1590.

J was distinguished from I by the Dutch scholars of the 16th century, and introduced into the alphabet by Giles Beys, printer, of Paris, 1550. Dufresnoy.

JACOBINS, a name given to the Dominicans in France, because their first convent was the hospital of the pilgrims of St. James (Jacobus), hospital of the pilgrims of St. James (Jacobus), at Paris, at the request of pope Honorius III. (1216-27). The Jacobin club (first called "club Breton") consisted of about forty gentlemen and men of letters, who met in the hall of the Jacobin friars, at Paris, in Oct. 1789, to discuss political and other questions. Similar societies were instituted in all the principal towns of the kingdom. The club was closed II Nov. 1794.

JACOBITES, a Christian sect, so called from Jacob Baradssus, a Syrian, about 541; see Euty-chians.—The partisans of James II. (Latin, Jacobus II.) were so named after his expulsion from England in 1688.

JACOBUS, a gold coin, so called from king James I. of England, in whose reign it was struck, 1603-25.

JACQUARD LOOM, for figured fabrics, invented by Joseph Marie Jacquard, of Lyons, and patented 23 Dec. 1801.

JACQUERIE, a term applied to bands of revolted peasants (headed by one Caillot, called Jacques Bonhomme), who ravaged France during the captivity of king John in 1358, and were quelled with much bloodshed. Similar insurrections occurred in Germany. One was termed the Bundschuh. from the large shoe especially worn by peasants, in 1502; and another termed the Bund (or league) of the Poor Conrad, 1514 and 1524, which also cost about 100,000 lives, and led to the insurrection of the anabaptists.

JAFFA, a scaport of Syria, celebrated in scripture as Joppa, whence Jonah embarked (about 862 B.C.), and where Peter raised Tabitha from the dead B.c.), and where Peter raised Tabitha from the dead (A.D. 38); in mythology the place whence Perseus delivered Andromeda. Jaffa was taken by the caliph Omar, in 636; by the Crusaders, 1099; by Saladin, 1193; by Louis IX., 1252; and by Bonaparte, 7 March, 1799; the French were driven out by the British in June, the same year. Here, according to sir Robert Wilson, were massacred 3800 prisoners by Bonaparte; but this is doubted. Jaffa suffered by an earthquake in Jan. 1837, when it is said that 12.000 persons were killed. 13,000 persons were killed.

JAGELLONS, a dynasty which at times reigned over Lithuania, Poland, Hungary, and Bohemia, beginning with Jagellon, duke of Lithuania (husband of Hedwig, daughter of Louis of Hungary, 1384), who became king of Poland as Ladislas III. or V. in 1399, and ending with Sigismund II., who died in 1572.

JANISSARIES (Turkish iéni tchéri, new soldiers), an order of infantry in the Turkish army; originally, young prisoners trained to arms; were first organised by Orean, about 1330, and remodelled by his son Amurath I. 1360; their numbers being increased by following sultans. In later days they

degenerated from their strict discipline, and several

times deposed and killed the sultans. During an in-

surrection, 14-15 June, 1826, when nearly 3000 of them were killed, the Ottoman army was re-organised by Mahmud II. and a firman was issued on 17 June, abolishing the Janissaries.

JANSENISTS, persons who embraced the doctrines of Cornelius Jansen, bishop of Ypres, who died in 1638. The publication of his "Augustissus," 1640, in which he maintained the doctrine of free grace, kindled a fierce controversy, and was condemned by a bull of pope Urban VIII. in 1642.
Through the Jesuits Jansenism was condemned by Innocent X. in 1653, and by Clement XI., in 1713, by the bull Unigenitus. This bull the French thank in 1865. church rejected. Jansenism still exists at Utrecht and Haarlem; see Port Royalists. Loos, abp. of Utrecht, died, June, 1873.

JANUARY derives its name from Janus, an early Roman divinity. January was added to the Roman calendar by Numa, 713 B.C. He placed it about the winter solstice, and made it the first month, because Janus was supposed to preside over the beginning of all business. In 1751 the legal year in England was ordered to begin on 1 Jan. instead of 25 March.

JANUS, TEMPLE OF, at Rome, was erected by Romulus, and kept open in time of war, and closed in time of peace. During above 700 years it was shut only—under Numa, 714 B.C.; at the close of the first Punic war, 235 B.C.; and under Augustus, 29, 25, and 5 B.C.

The Jesuit missionaries followed, and made a number of converts, who sent a deputation to pope Gregory XIII. in 1585; but a fierce persecution of the Christians bogan in 1590, aggravated it is said by the indiscreet zeal and arrogance of the Jesuits: thousands of the converts suffered death; and the Portuguese were utterly expelled, 1637-42. The Dutch trade with Japan commenced about 1600 under severe restrictions, and has since been frequently suspended; other nations, except Chinese, being excluded. The learned Engelbert Keempfer visited Japan in 1690, and published an account of it with plates.

JASMINE or JESSAMINE (Jasminum officinals), native of Persia, &c., was brought hither from Circassia, before 1548. The Catalonian jasmine came from the East Indies, in 1629, and the yellow Indian jasmine in 1656.

JASSY, the capital of Moldavia, frequently occupied by the Russians; taken by them in 1739, 1769, and 1828. A treaty between them and the Turks was signed here, 9 Jan. 1792.

JAVA, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619; see Batavia. The atrocious massacre of 20,000 of the unarmed natives by the massacre of 20,000 or the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British, 18 Sept. 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland by treaty in 1814, and given up in 1816. The English promoted free labour instead of forced; but the limits and free labour instead of forced; but the Dutch reverted to the old system, and in 1830 abolished free labour, introducing the "culture system," by which the government controls the cultivation of the land and buys the produce at its own price. In Aug. 1860, the Swiss soldiers here, aided by the natives, mutinied, but were soon reduced, and many suffered death. The diminished prosperity of Java led to warm discussions in the Dutch chamber in 1866.

The valuable "History of Java," by sir T. Stamford Raffics (successful governor 1811-16), was published

Java has a great many volcanoes, and has frequently been devastated by eruptions and earthquakes; those of 5 Jan. 1699, 31 Oct. 1876, and 10 June, 1877, were very destructive.

Very destructive.

Java and neighbouring isles desolated by a series of violent eruptions from about two-thirds of its 46 volcances, beginning with Krakatoa, casting up immense quantities of lava, nud, ashes, and fragments of rocks, darkening the air for about 50 square miles. Moundarkening the air for about 50 square miles. Mountains were split up, some disappeared, and many new craters were formed. Rumbling noises heard 25 Aug., violent eruptions of Krakatoa 26 Aug. There was much submarine disturbance, and an immense "tidal wave" destroyed Anjer and other places, 27 Aug. The lighthouses in the straits of Sunda were swallowed up, and new volcanic peaks appeared, rendering navi-gation highly dangerous. Loss of life estimated at 35,000, 25-28 Aug. Great atmospheric, oceanic, and electrical disturbances for thousands of square miles. See under Sun, 1883.

A committee of the Royal Society issued a report on the

eruption Oct. 1888.

Serious volcanic outbreaks; great destruction; about 500 persons perish, early May, 1885. Insurrection of the natives at Anjer; some Europeans and natives killed; the revolt checked by the police and settled, 16 July, 1888.

On 15 June, 1858, the fanatic Mahometans massacred twenty-six of the Christian inhabitants, among them the Eng-lish and French consuls and part of their families; but many fied to the shipping. On the delay of justice, commodore Pullen, with the Cyclope, bombarded the town, 25, 26 July. On 6 Aug. eleven of the assassins were executed; the ringleaders afterwards.

JESUIT'S BARK, called by the Spaniards fever-wood, from the cinchona or chinchona tree, discovered, it is said, by a Jesuit, about 1535 (and used by the order). Its virtues were not generally known till 1633, or 1638, when it cured offever the wife of the viceroy (Chinchona) at Peru, hence termed pulvis comitisse. It was sold at one period for its weight in silver, and was introduced into France in 1649; and is said to have cured Louis XIV. of fever when he was dauphin. It came into general use in 1680, and sir Hans Sloane introduced it here about 1700. The cinchona plant, largely planted in the Neilgherry hills, India, in fever-wood, from the cinchona or chinchona tree, largely planted in the Neilgherry hills, India, in 1861, is said to be thriving greatly, and also in Ceylon; see Quinine.

JEWISH ERA AND CALENDAR. The Jews usually employed the era of the Seleucides until the 15th century, when a new mode of computing was adopted. They date from the creation, which they consider to have been 3760 years and 3 months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years. The Jewish year consists of either twelve or thirteen months, of 29 or 30 days. The civil year commences with the month Tieri, immediately after the new moon following the autumnal equinox; the ecclesiastical year begins with Nisan.

JULIAN ERA and YEAR, see Calendar. Julian period (by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the ambiguity attendant on reckoning any period antecedent to our era, an advantage in common with the mundane eras used at different times. By subtracting 4713 from the Julian period, our era is found; if before Christ, subtract the Julian period from 4714.

JURIDICAL SOCIETY was established in Feb. 1855, and opened with an address by air R. Bethell on 12 May following.

JURIES. Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Angle-Saxon freemen appointed to try causes between the English and Weish men of property, and made responsible, with their whole estates real and personal, for false verdicts. Lambard. By most authorities their institution is ascribed to Alfred about 886. In Magna Charta, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one half denizens, and the other half aliens, stat. 28 Edw. III. 1353. By the common law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm, who is to be parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers. An act for the trial by jury in civil cases in Scotland was passed in 1815. An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will. IV. 1833. A new act respecting juries, regulating their payment, &c., was passed 9 Aug. 1870. The clause respecting their payment was rescinded by act passed 28 Feb. 1871. KARS, a town in Asiatic Turkey, captured by the Russians under Paskiewich, 15 July, 1828, after three days' conflict. In 1855 it was defended by general Fenwick Williams, with 15,000 men, and with three months' provisions and three days' ammunition, against the Russian general Mouravieff, with an army of 40,000 infantry and 10,000 cavalry. Let us arrange a capitulation that remains of an army. Let us arrange a capitulation that will satisfy the demands of war, without disgracing humanity." A large secret trade union in the EXIORTS OF LABOUR. A large secret trade union in the United States, said to have been originated by a man named Stevens in Philadelphia in 1869, for protection of workmen against capitalists. They were energetic in the promotion of railway and other strikes, especially in Missouri in March, 1886. Head quarters at Philadelphia, May, 1886. The society is condemned by the pope. Decline of the order reported Aug. 1888.

KNIVES In England, Hallamshire (the country round Sheffield) has been renowned for its cutlery for five centuries; Chaucer speaks of the "Sheffield thwytel." Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made fine knives, &c.; and that he obtained a prohibition of foreign ones, 1563. Clasp or spring knives became common about 1650; coming originally from Flanders.—Knife-cleaning ma-chines were patented by Mr. George Kent in 1844 and 1852; others have been invented, by Masters, Price, &c.; see Forks.

KNOW-NOTHINGS, a society which arose in 1853, in the United States of N. America. Their principles were embodied in the following propositions (at New York, 1855). They possessed several newspapers and had much political influence :-

The Americans shall rule America.

2. The Union of these States.

3. No North, no South, no East, no West. 4. The United States of America—as they are—one and inseparable.

5. No sectarian interferences in our legislation or in the

administration of American law.

 Hostility to the assumption of the pope, through the bishops, &c., in a republic sanctified by Protestant blood.

Thorough reform in the naturalisation laws.
 Free and liberal educational institutions for all sects and classes, with the Bible, God's holy word, as a universal text-book.

A society was formed in 1855 in opposition to the above, called Know-Somethings. Both bodies were absorbed into the two parties, Democrats and Republicans, at the presidential election in Nov. 1856.

KONIEH (formerly Iconium). Here the Turkish army was defeated by the pashs of Egypt, after a long sanguinary fight, 21 Dec. 1832. The grand vizier was taken prisoner.

KÖNIGGRÄTZ (Bohemia). Near here was fought the decisive battle between the Austrians commanded by marshal Benedek, and the Prussians commanded by their king William I., 3 July, 1866. Prince Frederick Charles halted at Kammeniz on Monday, 2 July, his troops commenced their march at midnight, and the first shot was fired about 7:30 a.m. 3 July. The attack began at Sadowa (after which the battle is also named) about 10 clock, and a desperate struggle ensued, the result ap-pearing uncertain, till the army of the crown prince of Prussia arrived about 12 30. When Chlum, which had been taken and lost seven times by the Prussians, was taken for the eighth time, the fate of the day was decided; and the retreat of the Austrians, at first orderly, became a hasty disastrous flight. About 400,000 men were engaged in this battle, one of the greatest in modern times. The hattle, one of the greaces in account, about 40,000 Austrians are said to have lost 174 guns, about 40,000 billed and wounded, and 20,000 prisoners. The killed and wounded, and 20,000 prisoners. The Prussians lost about 10,000 men. The victory gave the supremacy in Germany to Prussia, unity to North Germany, and Venetia to Italy; and led to the locial time victory gave the locial time victory gave. the legislative independence of Hungary.

KÖNIGSBERG, the capital of east Prussis, was founded by the Teutonic knights in 1255, and became the residence of the grand master in 1457. It joined the Hanseatic league in 1365. It was ceded to the elector of Brandenburg in 1657, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. Here king William I. and his queen were crowned, 18 Oct.,

The famous tun of St. Bernard's was said to hold 800 tons; see Heidelberg Tun.

KOOKAS, a warlike reforming sect in N. W. India, founded by Baluk Ram about 1845, and after his death, about 1855, headed by Ram Singh, who preached the restoration of the old Sikh religion, which venerated cattle and punished their slaughterer. After several outrages against the Mahometans, an outbreak of the Kookas took place near Loodiana, which was vigorously suppressed, 15 Jan. 1872, by commissioner Cowan, who ordered 49 prisoners to be blown from cannon, 17 Jan. Several others were tried and executed by commissioner Forsyth soon after. For this severity Mr. Cowan was ordered to be dismissed, and Mr. Forsyth removed to another station, April, 1872.
The Kooka leaders claim 800,000 followers; but the probable number is about one-tenth.

KORAN or ALCORAN (AL KURAN), the sacred book of the Mahometans, was written about 610, by Mahomet (who asserted that it had been revealed to him by the angel Gabriel in twenty-three years), and published by Abu-bekr about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obe-dience to Mahomet as the prophet. The leading article of faith preached is compounded of an eternal cruth and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God.

By direction of the American minister at Constantinople, captain Ingraham, of the American sloop St. Louis, demanded his release; but having heard that the prisoner was to be clandestinely transported to Trieste, he demanded his surrender by a certain time, and prepared to attack the Austrian vessel on 2 July; Koszta was then given up. An ounce weight of Flanders thread has been frequently sold for four pounds in London; and its value, when manufactured, has been increased to forty pounds, ten times the price of standard gold. A framework knitter of Nottingham, named Hammond, is said to have invented a mode of applying his stocking-frame to the manufacture of lace from studying the lace on his wife's cap, about 1768. LAING'S NEK, see Transvaal, 1881.

LAKE DWELLINGS contain relics of the stone, iron, and brass ages. Herodotus (about 450 B.C.) described the Pæonians as living on platforms in Lake Prasias. In 1855, Dr. Keller discovered the remains of lake habitations which had been supported on piles in several Swiss lakes ages ago. His book was published in England in 1866. Similar relics discovered in lake Constauce, March, 1882; they have also been discovered in Britain and various parts of Europe, Africa, and South America; they are now considered to be evidence of a stage in human progress. The artificial fortified islands termed "Crannoges" discovered in some Irish lakes are attributed to the 9th and 10th centuries. They have been frequently used as places of refuge. Artificial lake, see under Liverpool, 1881 et seq.

and four by act of 1885.

The tower of the church was erected about 1375; and other parts of the edifice in the 15th century. Simon of Sudbury, archbishop of Canterbury, was killed here by the followers of Wat Tyler, who attacked the palace, burnt the furniture and books, and destroyed the registers and public papers, 14 June, 1381. The

domestic portion of the palace was greatly enlarged for archbishop Howley (who died 1848), by Mr. Blore, at an expense of 52,000. The palace was reopened after restoration, Oct. 1873; see Canterbury, Articles. For Lambeth Conference see Pan-Anglican Synods. Lambeth bridge was freed from toll 24 May, 1879.

LAMMAS-DAY, the 1st of August, one of our four cross quarter-days of the year. Whitsuntide was the first, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Ladyday, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. Lammas probably comes from the Saxon hiammesse, loaf mass, because formerly upon that day our ancestors offered bread made of new wheat. Anciently, those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high mass.

A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé-Argand in 1784, and was brought into general use in England early in the present century. On his principle are founded the lamps invented by Carcel about 1803, and since 1825, the moderator lamps of Levavasseur, Hadrot, and Neuburger. See Safety Lamp. Paraffin oil and naphtha spirit are now much used in lamps.

Williamson, of Rylands, 21 Nov. 1881.

LANCASTERIAN SCHOOLS, based on a

system of education by means of mutual instruction, devised by Joseph Lancaster about 1796, were not much patronised till about 1808. The system led to the formation of the British and Foreign School society, in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

Mr. Wakley died 16 May, 1862. The proprietors of the "Lancet" have at various times employed medical men as commissioners of enquiry. The reports of the Analytical Sanitary Commission of the "Lancet" in 1851-54. were published by Dr. A. H. Hassall, as "Food and its Adulterations," in 1855. The "Lancet" commissioners (three physicians) enquired into the state of workhouse infirmaries in London, 1865, and in the country, 1867.

LANGUAGE must either have been revealed originally from heaven, or the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and many modern philosophers. Some suppose Hebrew to have been the language spoken by Adam; others say that the Hebrew, Chaldee, and Arabic are only dialects of the original tongue. "And the whole earth was of one language and of one speech," Genesis xi. 1. George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England.

The original European languages were thirteen, viz: Greek, Latin, German, Sclavonian, spoken in the east; Welsh; Biscayan, spoken in Spain: Irish; Albanian, in the mountains of Epirus; Tartarian; the old Illyrian; the Jazygian, remaining yet in Liburnia; the Chaucin, in the north of Hungary; and the Finnic, in east Friesland.

From the Latin sprang the Italian, French, Spanish, and

Portuguese.

LATIN LANGUAGE (founded on the Oscan, Etruscan, and Greek), one of the original languages of Europe, and from which sprang the Italian. French, and Spanish; see Lesium. A large portion of our language is derived from the Latin. It ceased to be spoken in Italy about 581; and was first taught in England by Adelmus, brother of Ina, in the 7th century. The use of Latin in law deeds in England gave way to the common tongue about 1000; was revived in the reign of Henry II.: and again was replaced by English in the reign of Henry III. It was finally discontinued in religious worship in 1558, and in conveyancing and in courts of law in 1731 (by 4 Geo. II. o. 25). A corrupt Latin is still spoken in Roumelia. The foreign pronunciation of Latin (a, ah; e, a; i, e, &c.) was adopted in English universities and many schools about 1875-6.

The French ministry accepted it; and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France, and the de-luded rich subscribed for shares both in the bank and the companies. In 1718 Law's was declared a royal bank, and the shares rose to upwards of twenty-fold the original value; so that, in 1719, they were worth more than eighty times the amount of all the current specie in France. In 1720 this fabric of false credit fell to the ground, spreading ruin throughout the country. Law died in poverty at Venice in 1729.—The South Sca Bubble in England occurred in 1720; see South Sea.

LIMA (Peru). In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded this city, and gave it the name of Ciudad de los Reyes, or city of the kings, 1535. Here he was assassinated, 26 June, 1541. Awful earthquakes occurred here, 1566, 1630, 1657, and 28 Oct. 1746. In 1854-5, thousands perished by yellow fever. LIMBURG (Netherlands), a duchy in the 10th century; acquired by the dukes of Brabant about 1288; added to Burgundy about 1429; passed to the house of Austria in 1477; became one of the United Provinces, 1609; conquered and annexed to the French republic, 1795; restored to the Netherlands, 1814; divided between Holland and Belgium, 1830; completely separated from the German confederation by treaty, 11 May, 1867.

LIME or LINDEN TREE, probably introduced in the 16th century. The limes in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his "Fumifugium" (1661). A limetree planted in Switzerland in 1410, existed in 1720, the trunk being thirty-six feet in circumference.

LIME-LIGHT, produced by the combustion of oxygen and hydrogen or carburetted hydrogen on a surface of lime. This light evolves little heat and does not vitiate the air. It is also called Drummond Light, after its inventor, lieut. Thomas Drummond, who successfully produced it as a first-class light in 1826, and employed it on the ordnance survey. It is said to have been seen at a distance of 112 miles. It was tried at the South Foreland lighthouse in 1861. Lieut. Drummond was born, 1797, died 15 April, 1840. To him is attributed the maxim that 4 property has its duties as well as its rights."

LIMERICK, anciently Lumneach (8. W. Ireland). About 550, St. Munchin is said to have founded a bishopric and built a church here, which latter was destroyed by the Danes in 853. Donald O'Brien, king of Limerick, founded the cathedral about 1200. Limerick obtained its charter in 1195, when John Stafford was made first provost; and its first mayor was Adam Servant, in 1198. It was taken by Ireton after six months' siege in 1650. In Aug. 1690 it was invested by the English and Dutch, and surrendered on most honourable terms, 3 Oct. 1691.* An awful explosion of 218 barrels of

LIMITED LIABILITY. An act for limiting the liability of joint stock companies, 18 & 19 Vict. c. 133 (passed 1855), was several times amended 1850-7-8. On 31 May, 1864, "3830 joint stock companies had been formed and registered on the limited liability principle, and 938 had ccased to exist." It was occasionally used by the Germans in the war 1870-1, and was tried and well reported of for power and safety at Nant Mawy quaries, near Shrewsbury, 9, 10 May, 1871, and again on 20 Feb. 1872, before the government explosive committee, with similar results.

LITHOGRAPHY (drawing on stone). invention is ascribed to Alois Sennefelder, about 1796; and shortly afterwards the art was announced in Germany, and was known as polyantography. It became partially known in England in 1801, et seq., but its general introduction is referred to Mr. Ackermann, of London, about 1817. Sennefelder died in 1841. LOLLARDS (by some derived from the German lollen, to sing in a low tone), the name given to the first reformers of the Roman catholic religion in England, the followers of Wykliffe. The sect is also said to have been founded in 1315 by Walter Lollard, who was burnt for heresy at Cologne in 1322. The Lollards are said to have devoted themselves to acts of mercy. The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb. 1401, when the Lollards were proscribed by parliament, and numbers of them were burnt alive. Sir John Cobham, lord Oldcastle, a follower of Wykliffe, was accused of treason and condemned, Sept. 1413. He escaped to Wales, where he was captured, and brought to London and burnt, 25 Dec. 1418. Lollards' tower, part of the bishop's prison, was near St. Paul's, not Lambeth palace. Dr. Maitland.

LOMBARDISTS, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

LOMBARD MERCHANTS, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice. Anderson. Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons who were not able to pay down the tenths which were collected throughout the kingdom with great rigour that year, 13 Hen. III. 1299. They had offices in the street named after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

LOMBARDY (N. Italy) derived its name from the Longobardi, a German tribe from Branden-

burg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from 568 to 774. The last king, Desiderius, was dethroused by Charlemagne. (For a list of the Lombard kings, see Italy.) About the end of the 5th century the chief towns of Lombardy fortified themselves, and became republics. The first Lombard league, consisting of Milan, Venice, Pavia, Modena, &c., was formed to restrain the power of the German emperors, in 1167. On 29 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1226 another league was formed against Frede-rick II., which was also successful. After this, petty tyrants rose in most of the cities, and foreign influence quickly followed. The Guelf and Ghinelline factions greatly distracted Lombardy; and from the 15th century to the present time, it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisal-pine republic, and in 1805 with the kingdom of Italy. On the br-aking up of the French empire in 1815, the LOMBARDO-VENETIAN KINGDOM was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848; but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria after 1849. In 1857 diplomatic relations were suspended; and in April, 1859, war broke out; the Austrians crossing the Ticino and entering Piedmont. The French emperor declared war against Austria, and immediately cent troops into Italy. The Austrians were defeated at Montr bello, 20 May; Palestro, 30, 31 May; Magenta, 4 June; and Solferino, 24 June. By the peace of Villafranca (11 July), the largest part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the new kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct. 1867.

LONATO (Brescia, N. Italy). Here Napoleon Bonaparte defeated Wurmser and the Austrians, 3 Aug. 1796.

LONDON. Some assert that a city existed on the spot 1107 years before the birth of Christ, and 354 years before the foundation of Rome, that it was the capital of the Trinobantes, 54 B.C., and long previously the seat of their kings. In A.D. 61 it was known to the Romans as Lundinium, or Colonia Augusta, and the chief residence of the merchants. It is said, but not truly, to have derived its name from Lud, an old British king, who was buried near where Ludgate formerly stood; but its name is from Llyn-Din, the "town on the lake." † It became the capital of the Saxon kingdom of Essex,

ROYAL MARRIAGE ACT, 12 Geo. III. c. 11, was passed in 1772, in consequence of the marriage of the duke of Gloucester, the king's brother, with the widow of the earl Waldegrave, and of the duke of Cumberland with the widow of colonel Horton and daughter of lord Irnham. (By this act, none of the descendants of George II., unless of foreign birth, can marry under the age of 25, without the consent of the king; at and after that age, after twelve months' notice given to the privy council, they may contract such marriage, which shall be good unless both houses of parliament disapprove. The marriage of the duke of Sussex with the lady Augusta Murray, solemnised in 1793, was pronounced ellegal, 1794, and the claims of their son, sir Augustus d'Este, declared invalid, by the house of lords, 9 July, 1844. He married lady Ceclia Underwood (afterwards duchess of Inverness), 1831.

HALF MARRIAGE. Sent. Matrimonium. Among the
Romans concubinage was a legitimate union, not
merely tolerated but authorised. The concubine had
the name of sent-conjux. Men might have either a
wife or a concubine, provided they had not both together. Constantine the Great checked concubinage,
but did not abolish it. This ancient custom of the Romans was preserved, not only among the Lombards, but by the French when they held dominion in that country. Cujas assures us that the Gascons and other people bordering of the Pyrenean mountains had not relinquished this custom in his time, 1590. The women bore the name of "wives of the second order." Henault. See Morganatic Marriages.

Double Marriages. There are some instances of a husband and two wives (but they are very rare) in countries where polygamy was intenlicted by the state. The first Lacedæmonian who had two wives was Anaxandrides,

Lacedemonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C. Dionysius of Syracuse married two wives, viz.: Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 308 B.C. It is said that the count Gleichen, a German nobleman, was permitted, under peculiar circumstances, by Gregory IX., in A.D. 1237, to marry and live with two wives. The Mormonites practise and encourage polygamy.

FORCED MARRIAGES. The stat. 3 Henry VII. (1267) made the principal and abettors in marriages with heiresses, &c., contrary to their will, equally guilty as felons. By 39 Eliz. (1366) such felons were denied the benefit of clergy. This offence was made punishable by transportation, 1 Geo. IV. (1820). The remarkable case of Miss Wharton, heiress of the house of Wharton, whom captain Campbell married by force, occurred in William captain Campbell married by force, occurred in William
III.'s reign. Sir John Johnston was hanged for said the young lady, and the marriage was annulled by parliament, 1690.—Edward Gibbon Wakefield was tried parliaments, 1000.—Edward Gibbon manerical was tired at Lancaster, and found guilty of the felonious abduc-tion of Miss Turner, 24 March, 1827; and his marriage with her was immediately dissolved by act of parlia-

M. Dubois of Paris suggests that these satellites may be planetoids attracted by Mars, Aethra and another of these bodies having disappeared about the time of the discovery

MARSEILLAISE HYMN. The words and music are ascribed to Rouget de Lille, or L'Isle, a French engineer officer, who, it is said, composed it by request, 1792, to cheer the conscripts at Strasburg. It derived its name from a body of troops from Marseilles marching into Paris in 1792 playing the tune. This account is doubted by some (1879). The author was pensioned by Louis Philippe, 1830.

MARSHALSEA COURT, having jurisdic-tion in the royal palace, was very ancient, of high dignity, and coeval with the common law. Since the decision of the case of the Marshalsea (see lord Coke's 10 Rep. 68) no business has been done in this court; but it was regularly opened and adjourned at the same time with the Palace court, the judges and other officers being the same. These courts and other officers being the same. These courts were removed from Southwark to Scotland-yard in 1801, were abolished by parliament, and discontinued 31 Dec. 1840; see Prisons.

During the civil wars they and their allies rebelled, having demanded and been refused the rights of Roman citizenship, 91 B.C. After many successes and reverses, they sued for and obtained peace and the rights they required, 87 B.C. The Marsi being Socii of the Romans, this was called the Social war.

MARSTON-MOOR (near York). The Scots and parliamentary army were besieging York, when prince Rupert, joined by the marquis of Newcastle, determined to raise the siege. Both sides drew up on Marston-moor, on 2 July, 1644, and the contest was long undecided. Rupert, commanding the right wing of the royalista, was opposed by Oliver Cromwell, at the head of troops disciplined by himself. Cromwell was victorious; he drove his opreturned to a second engagement and a second vic-The prince's artillery was taken, and the royalists never recovered the blow.

MARTELLO TOWERS, said to have been erected by Charles V. on the coasts of Italy. Similar circular buildings were erected in the beginning of the present century, on the southern coast of England, and other parts of the empire, as defences against invasion. The towers were said by some to be named from Cape Martello, or Mortella in Corsica. They are now being destroyed as obsolete.

MARTINIQUE (French West Indies), discovered in 1493 or 1502; settled by France, 1635. This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in Feb. 1762. They were restored to France at the peace of the following year. They were again taken, 16 March, 1794; restored at the peace of Amiens in 1802; again captured 23 Feb. 1809. A revolution in this island in favour of Napoleon was finally suppressed by the British, I June, 1815, and Martinique reverted to its French masters. Severe earthquakes occurred here in 1767 and 1839.

MARTINMAS, II Nov., the feast of St. Martin, bishop of Tours, in the 4th century, is quarter day in parts of the north of England and in Scotland. The high sheriffs of England and Wales are nominated on the morrow of St. Martin, 12 Nov.

It contains the district of Colombia, in which Washington is situate. It continued in the Union when the other slave states seceded in 1860 and 1861. The confederate army, under general Lee, after their victory at Bull Run, 30 Aug. 1862, crossed the Potomac and entered Maryland. They were followed by the federal army under McClellan. Severe conflicts ensued, especially on 17 Sept., at Antictam Creek, with great loss on both sides, each claiming the victory. The confederates retired into Virginia in good order, and it is said with much booty. Capital, Annapolis; population 1880, 934,943.

MASKS. Poppesa, the wife of Nero, is said to have invented the mask to guard her complexion from the sun; but theatrical masks were in use among the Greeks and Romans. Horace attributes them to Æschylus; yet Aristotle says the inventor and time of their introduction were unknown.—Modern masks, and muffs, fans, and false hair for the women, were devised in Italy, and brought to England from France in 1572. MASORAH (Hebrew, tradition), a collection of conjectural readings (Keris) of the Hebrew text of the Old Testament, with critical, grammatical, and exegetical remarks by various Jewish doctors, written between the 6th and 10th centuries, who also furnished the Masoretic vowel points.

The first Rabbinical Hebrew Bible, containing the Masorah, Targums, and comments, was printed by Bomberg at Venice, 1518. The "Book of the Masorah, the Hedge of the Law," was first printed at Florence, 1750.

MASQUERADES were in fashion in the court of Edward III., 1340; and in the reign of Charles II. 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 Geo. I. 1724. They were revived and carried to a shameful excess in violation of the laws, and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776. MASS, in the Roman church, is the office or prayers used at the celebration of the Eucharist, in memory of the passion of Christ, and to this every part of the service alludes. The general division consists in high and low; the first is that sung by choristers, and celebrated with the assistance of a deacon and sub-deacon; low masses are those in which the prayers are rehearsed without singing. Mass was first celebrated in Latin about 394; it was introduced into England in the 7th century. Prostration was enjoined at the elevation of the host in 1201. Dr. Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmund and others, during the 12th century. The English communion service was adopted in 1549; see Missal, and Ritualism.

MASTER of the Rolls, an equity judge, derives his title from having the custody of all charters, patents, commissions, deeds, and recognizances, entered upon rolls of parchment; his decrees are appealable to the court of chancery. The repository of public papers, called the Rolls, was in Chancery-lane. The rolls were formerly kept in a chapel founded for the converted Jews; but after the Jews were expelled the kingdom in 1290 it was annexed for ever afterwards to the office of the mastership of the rolls. Here were kept all the records since the beginning of the reign of king Richard III., 1483; all prior to that period being kept in the Tower of London; see Records. The first recorded master of the rolls was either John de Langton, appointed 1286, or Adam de Osgodeby, appointed r Oct. 1295; but it is clear that the office was in existence long before. Hardy. The duties were defined in 1833; the salary regulated in 1837. Changes by the judicature act of 1881. By the supreme court of judicature act, the master of the rolls was made a judge of appeal only.

MEAL TUB PLOT, against the duke of York, afterwards James II., contrived by one Dangerfield, who secreted a bundle of seditious letters in the lodgings of colonel Maunsell, and then gave information to the custom-house officers to search for smuggled goods, 23 Oct. 1679. After Dangerfield's apprehension, on suspicion of forging these letters, papers were found concealed in a meal-tub at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most eminent persons in the Protestant interest, who were against the duke of York's succession, of treason,—particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, I June, 1685, one of his eyes was struck out by a barrister named Robert Francis. This caused his death, for which his assailant was hanged.

They were expelled by the pacha of Egypt in 1818, who retired in 1841. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859. MESMERISM. Frederick Anthony Mesmer. a German physician, of Merseburg, published his doctrines in 1766, contending, in a thesis on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Yienna for Paris, in 1778, he gained numerous proselytes and much money. A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it. In 1859, the Mesmeric Infirmary issued its tenth annual report, archbishop Whately being president, and the earl of Carliale and Mr. Monckton Milnes (since lord Houghton) among the vice-presidents.

The first Messenian war began 743 B.C.; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. Eventually, Ithone was taken, and the Messenians became slaves to

METALS. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron." (Gen. iv.) Moses and Homer speak of the seven metals, and Virgil of the melting of steel. The Phonicians had great skill in working metals. Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added cosium, rubidium, thallium, indium, gallium, and others to the known metals. See Elements, Mines, Iron, and the other metals. "Metallurgy," published by Dr. John Percy, 1861-80; he died 19 June, 1889.

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. Mackintosh. Modern metaphysics arose in the 15th century—the period when an extraordingry impulse was given to the study of the ordinary impulse was given to the study of the human mind in Europe, commonly called the "re-vival of learning." Hobbes, Cudworth, S. T. Cole-ridge, Dugald Stuart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See Philosophy.

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead. See *Buddhism*.

METEORS, LUMINOUS, include shooting stars, fire-balls, and falling stones or aërolites. They were described by Halley, Wallis, and others early in the 17th century. The periodicity of the star showers about the 10th of August (termed in the middle ages St. Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herrick in 1837. METHUEN TREATY, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec. 1703, concluded by Paul Methuen, our ambassador at Lisbon. METRIC SYSTEM. Before the revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organisa-tion of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the metre, which is equal to a ten-milli inth part of the distance between the poles and the equator (3:2808 English feet) was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only legal one on 2 Nov. 1801. A decree on 12 Feb. accommodated the old measures to the new system; but on 4 July, 1837, it was decreed that after I Jan. 1840, the metric and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, and will probably in time be adopted in the British ompire.

MICHAELMAS, 29 Sept., the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and All Angels." Instituted, according to Butler, 487.

The custom of eating goose at Michaelmas has been erroneously attributed to Queen Elizabeth's eating of the bird at dinner on 29 Sept. 1588, at the house of sir Neville Umfreyville, at the time she heard of the destruction of the Spanish Armada. The custom is of much older date, and is observed on the continent. Clavis Calendaria

MICROBES, see Germ.

MICROMETER, an astronomical instrument used to measure any small distances and the minuter objects in the heavens, such as the apparent dia-meters of the planets, &c., was invented by Wm. Gascoigne, who was killed at the battle of Marston-moor, 2 July, 1644. It was improved by Huyghens about 1652. Sir Joseph Whitworth made a machine to measure the millionth of an inch, about 1858; the measurement of the 30,000th of an inch is now common.

MICROPHONE (Greek, mikros, little; phone, sound), a name given by Wheatstone, in 1827, to an instrument for rendering weak sounds audible by means of solid rods. The name was also given to an arrangement invented (in Dec. 1877) by professor D. E. Hughes (an American, an inventor of the printing telegraph), and shown to the Royal Society, 9 May, 1878.

An electric current is established between two modean electric current is established between two mode-rately conducting bodies (such as pieces of charcoal, metallised by being plunged when heated into mer-cury) resting slightly upon each other, mounted on a piece of thin wood. If the contact is so made that one of the bodies may be easily displaced, minute sounds produced on the wood disturb the electric conductivity at the place of contact, and may be hear by the help of the telephone. The sonorous and electric waves are thus rendered synchronous, and become convertible. The tread of a fly sounds like that of a large quadruped. See Telephone.

MICROSCOPES, said to have been invented by Jansen, in Holland, about 1500; by Galileo, about 1610; by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were mircusor. Hooke. In England great improvements were made Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1740), by Henry Baker, F. R. S., about 1763, and still greater during the present century by Wollaston, Ross, Jackson, Varley, Hugh Powell, and others. Diamona microscopes were made by Andrew Pritchard in 1824; and the properties of "test objects" to prove the qualities of microscopes, discovered by him and Goring in 1824-40. A binocular microscope (i.e., for two eyes), was constructed by professor Riddell in 1851, and Wenham's important improvements were made known in 1861. Treatises on the microscope by J. Quekett (1848), by Dr. W. B. Carpenter (1856 et seg.), by Dr. Lionel Beale (1858 et seg.), and Griffith and Henfrey's "Micrographic Dictionary" (1856, 1875, and 1883), are valuable. The Microscopical Society of London was established 20 Dec. 1839, and the Quekett Microscopical Club, 1865. In 1839, and the Quekett Microscopical Club, 1865. In 1865 Mr. H. Sorby exhibited his spectrum microscope, by which the millionth of a grain of blood was detected.

The lead mines of Cardiganshire, from which is the account of the particular ware discovered. silver has ever since been extracted, were discovered by sir Hugh Middleton in the reign of James I.; see Coal, and the various metals.

The study of mineralogy was advanced by Becker,
Kircher, and Woodward in the 17th century.

MORMONITES (calling themselves the Church of Jesus Christ of LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he said that he found the book of Mormon, written on gold plates in Egyptian characters. This book is said to have Solomon Spaulding (or by Martin Harris, who died Sept. 1875), as a religious romance in imitation of the scripture style. It was translated and published in America in 1830, in England in 1841. It fell into the hands of Rigdon and Smith, who determined to palm it off as a new revelation. The Mormonites command the payment of tithes, permit polygamy, encourage labour, and believe in their leaders working miracles. Missionaries are propagating these doctrines in Europe with more success than would be expected.

MOSAIC WORK (the Roman opus tesuli-tum), is of Asiatic origin, and is probably referred to in *Esther*, ch. i. 6, about 519 B.C. It had attained to great excellence in Greece, in the time of Alexander and his successors, when Soes of Pergamus, the most renowned Mosaic artist of antiquity, flourished. He acquired great fame by his accurate representation of an "unswept floor after a feast." The Romans also excelled in Mosaic artists of a successors and the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors of the successors work, as evidenced by the innumerable specimens preserved. In the 16th century Titian and Veroness also designed subjects for this art. The practice of copying paintings in Mosaics came into vogue in the 17th century; and there is now a workshop in the Vatican where chemical science is employed in the production of colours, and where 20,000 different tints are kept. In 1861, Dr. Salviati of Venice had established his manufacture of "Enamel-mosaics, and in July, 1864, he fixed a large enamel Mossic picture in one of the spandrils under the dome of St. Paul's cathedral, London. MOSCOW, the ancient capital of Russis, was founded, it is said, by Dolgorouki, about 1147. MOSQUITO COAST (Central America). The Indians inhabiting this coast were long under the protection of the British, who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1850, the two governments covenanted not "to occupy, or fortify, or colonise, or assume, or exercise any dominion over any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty; on which the latter agreed to cede the disputed territory to the republic of Honduras, with some reservation.* The matter was finally settled in 1859.

It is stated that Crompton at the time knew nothing of the latter. He did not patent his invention, but gave it up in 1780. MYSTERIES, derived from the Greek musterion, a mystery or revealed secret. The Sacred mysteries is a term applied to the doctrines of Christianity, called the "mystery of godliness," I Tim. iii. 16, as opposed to the "mystery of iniquity," 2 Thess. ii. 7. The Holy Eucharist is also termed the sacred mysteries. The Profans mysteries were the secret ceremonies performed by a se-lect few in honour of some deity. From the Egyptian mysteries of Isis and Osiris sprang those of Bacchus and Ceres among the Greeks. The Eleusinian mys-teries were introduced at Athens by Eumolpus, 1356 B.C.-MYSTERY PLAYS; see Drama.

MYSTICS, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified; for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clemens, Pantænus, Origen, and others, who mingled Christianity and Platonism, 2nd and 3rd centuries.

Much promoted by the works of the pseudo-Dionysius ("The Mystic Theology," &c), 6th century.

Introduced into the Western empire, 9th century.

Eminent Medisval mystics (opposed by the schoolmen), Master Eckhart (1251-1329); John Tauler of Strasburg, where he acted heroically during the plague, termed the "black death" (1290-1361); Henry Suso (1200-65). They aimed at a more spiritual religion than Romanism; but their followers were charged with immorality, panthelsm, communism, and maintaining private inspiration.

Jacob Böhme or Behmen, the German mystic, published his "Aurora" (an alleged divine revelation) 1612; died, 18 Nov. 1624.

For modern inystics, see Quakers, Quietists, Hutchinsonians and Swedenborgians. MYTHOLOGY (Greek mythos, fable), the traditions respecting the gods of any people. NAC'S HEAD STORY. Matthew Parker vas consecrated archbishop of Canterbury at Lameth, 17 Dec. 1559, by bishops Barlow, Coverdale, icory, and Hodgkins. For forty-five years after, the lomish writers asserted that Parker and others had seen ordained in an abnormal fashion by Scory at he Nag's Head Tavern, Cheapside. This fiction was refuted by Burnet, and is rejected by Roman latholic authorities, such as Lingard.

NAMES. Adam and Eve named their sons. 7en. iv. 25, 26. A Roman citizen had generally hree names; prenomen, denoting the individual; nomen, the gens or clan; cognomen, the branch of he clan: sometimes he had the agnomen (e. g., Publius Cornelius Scipio Africanus). The popes hange their names on their exaltation to the nontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout," 687. Platina. Onuphrius (followed by most of the molern authorities), refers it to John XII., 956; tating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul.

In France the name given at baptism was sometimes changed. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new names. See Surnames. Miss Yonge's "History of Christian Names," published 1863 (new edition 1884). M. A. Lower's "Patronymica Britannica," 1860.

NAMUR, in Belgium, was made a county in 932; taken by the French, I July, 1692; by William of England, 4 Aug. 1695; ceded to the house of Austria by the peace of Utrecht, and garrisoned by the Dutch as a barrier town of the United Provinces in 1715. The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1762, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814; assigned to Belgium, 1831. It was a site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo.

NANCY (N.E. France), an ancient city, capital of Lorraine, in the 13th century. After taking Nancy, 29 Nov. 1475, and losing it, 5 Oct. 1476, Charles the Bold of Burgundy was defeated beneath its walls, and slain by the duke of Lorraine and the Swiss, 5 Jan. 1477; see Lorraine. Nancy was embelliahed by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blücher, Jan. 1814, and on the retreat of MacMahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace.

NANKIN, said to have been made the central capital of China, 420. It was the court of the Ming dynasty from 1369 till Yung-lo removed it to Pekin in 1410. On 4 Aug. 1842, the British ships arrived at Nankin, and peace was made. The rebel Tae-pings took it on 19, 20 March, 1853. It was recaptured by the Imperialists, 19 July, 1864, and found to be in a very desolate condition.

The edict in favour of the Protestants issued here by Henry IV., 13 April, 1508, was revoked by Louis XIV., 22 Oct. 1685 (bicentenary celebration, 22 Oct. 1885). Awful cruelties were committed here by the republican Carrier, Oct.-Nov. 1793; see Drowning.

NAPIER'S BONES, see Logarithms.

NAPLES, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards divided into Palæopolis (the old) and Neapolis (the new city); from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans,

Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a

NATURAL PHILOSOPHY, see Philoophy.

NATURAL SELECTION, see Species.

NATURALISATION is defined to be "the taking a foreigner or alien a denizen or freeman of ny kingdom or city, and so becoming, as it were, oth a subject and a native of a king or country hat by nature he did not belong to." The first act f naturalisation passed in 1437; and various similar nactments were made in most of the reigns from

that time; several of them special acts relating to Institute; several of them special acts relating to individuals. An act for the naturalisation of the Jews passed May, 1753, but was repealed in 1754, on the petition of all the cities in England; see Jews, for the privileges since granted them. The act for the naturalisation of prince Albert passed 3 Vict., 7 Feb. 1840. A committee to inquire into the naturalisation laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct. 1868; reported about Feb. 1869; and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,500,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance; and by the convention signed 3 Feb. 1871, the nationality of British subjects was made dependent on choice and not on

NATURE PRINTING. This process consists in impressing objects, such as plants, mosses, feathers, &c., into plates of metal, causing these feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Kniphoff of Erfurt, between 1728 and 1757, produced his Herbarium vivum by pressing the plants themselves (previously inked) on paper; the impressions being afterwards coloured by hand. In 1833, Peter Kyhl, of Copenhagen, made use of steel rollers and lead plates. In 1842 Mr. Taylor printed lace. In 1847 Mr. Twining printed ferms, grasses, and plants; and in the same year Dr. Branson sugand plants; and in the same year Dr. Branson suggested the application of electrotyping to the im-pressions. In 1849, professor Leydolt, of Vienna, by the able assistance of Mr. Andrew Worring, obtained impressions of agates and fossils. The first practical application of this process is in Von Heufler's work on the Mosses of Arpasch, in Transylvania; the second (the first in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley, the illustrations to which were pre-pared under the superintendence of Mr. Henry Bradbury in 1855-56, who also in 1859-60 printed "The British Sea-weeds," edited by W. G. John-stone and Alex. Croall. The process was applied to butterflies by Joseph Merrin of Gloucester, in 1864.

NAVARINO (S. W. Greece), settled by the Araba 6th century; taken by the Turks, 1500; by Venetians, 1686; by Turks, 1718; by Greeks, 1821; by Turks, 1825. Near here, on 20 Oct. 1827, the combined fleets of England, France, and Russia, under command of admiral Codrington, nearly destroyed the Turkish and Egyptian fleet. More than thirty ships, many of them four-deckers, were blown up or burnt, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterised by the duke of Wellington as an "untoward event."

NAVARRE, now a province of Spain, formed a part of the Roman dominions, and was conquered a part of the Konian dominions, and was conquered from the Saracens by Charlemagne, 778. His descendants appointed governors, one of whom, Garcias Ximenes, took the title of king in 857. In 1076, king Sancho IV. was poisoned, and Sancho Ramorez of Aragon seized Navarre. In 1134, In 1134, Navarre became again independent under Garcias Ramorez IV. In 1234, Thibault, count of Champagne, nephew of Sancho VII., became sovereign of Navarre; and in 1284, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France.

NAVIGATION LAWS. A code of maritime aws is attributed to Richard I. of England, said to lave been decreed at the lale of Oleron, 1194 (see Heron), and further enactments were made by kichard II. in 1381.—In Oct. 1651, the parliament sassed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for he encouraging and increasing of shipping and navigation" (1660). The latter act restricts the mportation and exportation of goods from or to asia, Africa, or America, to English ships, of which he masters and three-fourths of the mariners are o be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation I Jan. 1850. The steam avigation act passed 14 & 15 Vict. c. 79, 1851, same into operation I Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865 the emperor recommended the nodification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, which we fleeting British. hiefly affecting British.

The first notice of the establishment of a uniform in the British naval service, which we

of a uniform in the British naval service, which we have met with, occurs in the Jacobie's Journal of 5 March, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a uniformity of clothing, for which purpose pattern coats for dress suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dockyards for their inspection." This is corroborated by the Gasette of 13 July, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the journal above mentioned, and which in fact is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 6 April, 1609, to six of his

principal masters of the navy, "liveric coats of fine red cloth." The warrant is stated to have been drawn verbatim from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum; but king James's limited red livery is supposed to have been soon discontinued.—Quarterly Review.

NAVY OF FRANCE. It is first mentioned in history, 728, when, like that of England at an early period, it consisted of galleys; in this year the French defeated the Frisian fleet. The French fleet was almost annihilated by Edward III. at the battle of Sluys, 24 June, 1340. It was considerably bettle of Sluys, 24 June, 1340. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. It was greatly increased by the emperor Napoleon III., was greatly increased by the emperor Napoleon III., and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 398 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-clad frigate Gloirs, constructed by M. Dupuy de Lôme, launched in 1850, was generally considered as accessful. The Solferies and Magazia were as successful. The Solferino and Magenta were launched in June, 1861; other iron vessels since. The Magenta was destroyed by fire, 6 killed, 31 Aug. 1875. A band of 102 Puri-tans, now termed the "Pilgrim Fathers" (with 28 women) arrived here in the May Flower, and founded the settlement on Plymouth Rock, 25 Dec. 1620, which was named New Plymouth. This was the nucleus of Massachusetts, from whence were gradually developed New Hampshire, Vermont, Connecticut, and Rhode Island. In 1643 these settlements formed the first American confederation, a defensive union, with a constitution based on the Mosaic law, governed by a religious aristocracy, which lasted till 1693. Maine was made an independent state in 1820.

In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England.—Hakkuyt. But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recognised in 1713, by the treaty of Utrecht, certain rights on the "French shores" being reserved for rights on the "French shores being reserved and France. NEW STYLE. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. I582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582, in Germany in 1584, in Switzerland in 1583 and 1584, in Hungary in 1587; and in Great Britain in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, II days; after 1800, I2 days. In Russia, Greece, and throughout the East, the old style is still retained. The czar, Alexander II., was born on the 17th April, 1818, old style, 29 April, new style; see Culendar.

NEW YEAR'S DAY, &c. The beginning of the Jewish year was changed and the passover instituted, 1401 B.C. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 B.C. On this day the Romans sacrified to Janus a cake of

The first general council was held here 19 June to 25 Aug. 325, which adopted the NICENE CREED and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Baster. An addition was made to the creed, 381; was rejected, 431. In the middle ages it was subject to Genoa, and suffered from the frequent wars, being taken and re-taken by the imperialists and French. It was taken by the Austrians under Melas, 1800; seized and annexed to France 1792; restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860; the people having voted nearly unanimously for this change by universal suffrage. The French troops entered I April, and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexa-

He set call from England in June, 1768; on the 14th of Nivember, 1770, discovered the source of the Blunkile, and returned home in 1773. This river overflows regularly every year, from about the 15th of June to the 17th of September, when, having givelier tility to the land, it begins to decrease. It mustries 16 cubits to ensure that fertility. NINEVEH, the capital of the Assyrian empire (see Assyria), founded by Ashur about 2245 B.C. Ninus reigned in Assyria, and named this city Nineveh, 2069 B.C.—Abbé Longlet. Jonah preached against Nineveh (about 862 B.C.), which was taken by Nebuchadnezzar, 606 B.C. The discoveries of Layard and others since 1839, in the neighbourhood of Mosul, at Koyunjik, the site of the ancient Nineveh, and other places, have in a manuer disinterred and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. Layard published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1840-50. Mr. Box-"Nneven and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. Mr. Hormusd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876. See Assyria. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawat, wine miles N. E. of Nimeroul and at Kornnik &c. nine miles N.E. of Nimroud, and at Koyunjik, &c., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (a.c. 885-860), builder of the palaces and temples of Kalakh, the capital of the middle Assyrian empire. Mr. Rassam arrived in London with collections, Dec. 1882.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that en-rich the British Museum, may be mentioned, the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from Nisr, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 2 Kings xix. 37.

NIOBIUM, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum (or tantalum) by Wollaston; but was rediscovered by H. Rose in 1846, and

named niohium.

NISMES (Nimes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The treaty termed the Pacification of Nismes (14 July, 1629) gave religious toleration for a time to the Huguenots.

in a separate state by Raymond Lully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785. Nitrous acid was discovered by Scheele about 1774. Nitrous gas was accidentally discovered by Dr. Hales. Nitrous oxide gas (laughing gas) was discovered by Dr. Priestley in 1776. The use of this gas as an ansesthetic began in America in 1864; at Paris, 1866; in London, 31 March, 1868, ingenious apparatus having been invented for its application.

NITROGEN or AZOTE (from the Greek a, no, and zao or zō, I live), an irrespirable elementary gas, and an important element in food, discovered gas, and an important element in 1900, uncorrected by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these covered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies.

NITRO-GLYCERINE (also called NITRO-LEUM), an intensely explosive amber-like fluid, discovered by Sobrero in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid, and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent, in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see Dynamite. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up; 15 persons killed, many injured, 10 June, 1868. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1869, and repealed by the Explosives Act of 1875. Secret manufacture discovered, see Birmingham, 1883.

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honour, to distinguish them from the common or honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montague), ennobled in 1470, was degraded from the peerage by parliament, or account of his utter want of property to Edw. on account of his utter want of property, 19 Edw. NOMINALISTS (or CONCEPTUALISTS), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Complègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

NON-CONFORMISTS. The Protestants in England are divided into conformists and nonconformists, or, churchmen and dissenters. trist place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments;" see Puritans, and Dissenters. The laws against them were relaxed by the Toleration act, 24 May, 1689.—The Nonconformus newspaper (edited by Mr. Edward Miall, aft. M.P.) first appeared 14 April, 1841. He died 29 April, 1881.

ORANGES. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

ORATOR HENLEY. An eccentric English gentleman of some talents, in 1726, opened his "oratory," a kind of chapel, in Newport-market, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him many hearers; but he was too imprudent to gain any permanent advantage. He removed his oratory to Clare-market, and sank into obscurity previously to his death, in 1756.

ORATORIANS (from the Latin orars, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibieuf and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V. 1613.—The rev. Frederick Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, in 1848, and afterwards at Brompton.

ORATORIO, a kind of musical sacred drama, the subject of it being generally taken from the Seriptures. The origin of our oratorios (so named from having been first performed in an oratory), is ascribed to St. Philip Neri, about 1550. The first true oratorio, Emilio del Cavaliere's "Rappresentazione," was performed at Rome in 1600. He was followed by Giovanni Carissimi, Alessandro Scarlatti, &c. The first oratorio in London was performed in Lincoln's-inn theatre in Portugal-street, in 1732. Handel's oratorio of "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741; Haydn's "Creation" in 1798; Beethoven's "Mount of Olives," 1803; Spohr's "Last Judgment" (properly "Things"), 1825; Mendelssohn's "St. Paul" in 1836, and "Elijah" in 1846; Costet's "Eli," 1865; "Naaman," 1864; S. ORDEAL was known among the Greeks and Jews (Num. v. 2). It was introduced into England by the Saxons. A prisoner who pleaded not guilty might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only. The trial by ordeal was abolished in 1218.

OWHYHEE or HAWAII, an island in the N. Pacific Ocean, discovered Dec. 1778, by capt. Cook. On 14 Feb. 1779, he here fell a victim to a sudden resentment of the natives. OXFORD'S ACT, BISHOP OF, see District

OXFORD'S ASSAULT on THE QUEEN. Edward Oxford, a youth who had been a servant in a public-house, discharged two pistols at queen Victoria and prince Albert, as they were proceeding up Constitution-hill in an open phaeton from up constitution-nill in an open phaeton from Buckingham palace, 10 June, 1840. He stood within a few yards of the carriage, but neither her majesty nor the prince was injured. Oxford was tried at the Old Builey (10 July), and was adjudged to be insane, and sent first to Bethlehem hospital, next to Broadmoor; and set at liberty in 1868, on condition of going abroad.

OXUS (the Persian and Turkish Djihoun, local name, Amou Daryá), a river of Central Asia; supposed to have changed its course before 1000 A.D., and to have resumed its ancient bed in 1878.

OXYGEN, a gas (named from the Greek oxus, sharp, as being generally found in acids), is the most abundant of all substances, constituting about one-third of the solid earth, and forming about nine-tenths of water and one-fifth of the atmo-sphere. It was first separated from red oxide of mercury by Priestley, I Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec. 1864; its object being the cheap manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c. Oxygen was liquefied by Raoul furnaces, &c. Oxygen was liquefied by Raoul Pictet at Geneva; (pressure, 320 atmospheres, temp. 140 below zero cent.) 22 Dec. 1877. See Ozoñe.

Professor Dowar obtained 2 cubic centimetres (1/1) of a fluid ox.) of liquid oxygen by means of liquid ethylene (the illuminating part of coal gas), temp. 140 below zero Cent. (by Wroblewski and Olzewski's method) at the Royal Institution, London, in the presence of the prince and princess of Wales, 26 June, 1884. He exhibited for the first time some solid oxygen in the form of snow (temperature—200 cent.—400 fahr.) produced by placing liquid oxygen in a partial vacuum at the Royal Institution 27 May, 1886.

A statue of Priestley, by F. J. Williamson, at Birmingham, was unveiled by professor T. H. Huxley, 1 Aug. 1874, the centenary of the discovery of oxygen. This was also celebrated at Northumberland, Pennsylvania, where he was burled, Feb. 1804. The following telegram was sent 31 July: "The brethren at the grave to the brethren at the home of Priestley send greeting on this centennial anniversary of the birth of chemistry."

A method of obtaining oxygen from air, devised and patented by M. Margis, of Paris. The principle is that of dialysis, or diffusion under pressure, Sept. 1882. See Gas (liquefaction).

OYER AND TERMINER, a commission directed to the judges of the courts, by virtue whereof they have power to hear and determine treasons, felonies, &c., 1285.

O YES! A corruption of the French oyez, hear ye! The ancient term still used by a public crier and by the usher of courts of justice to enjoin silence and attention.

OYSTER (the Latin Ostrea edulis). British oysters are celebrated by the Roman satirist Juvenal (Sat iv. 140) about 100. The robbery of oyster-beds is prohibited by 7 & 8 Geo. IV. c. 29 (1827). About 15,000 bushels of oysters were said to be produced from the Essex beds alone. In 1858 M. Coste commenced rearing oysters in great numbers on the coast of Brittany, and his plan has been found suc-

is about a million-fold. A committee recommend
a close time for dredging, viz., 1 May to 1 Sept., deepsea fishing to be restricted, as at present, from 15 June

OZOKERIT, a mineral hydro-carbon found in Moldavia and Wallachia. From it is distilled a substance suitable for making candles, introduced in the autumn of 1871.

OZONE (from the Greek ozem, to yield an odour), was discovered by Schönbein, of Basel, in 1840, when experimenting with the then newlyinvented battery of sir Win. Grove, and was recognised by him successively as a minute constituent of the oxygen gas resulting from the electrolysis of water effected by a current of high tension; of air or oxygen through which electric discharges have taken place; and of air in which moist phosphorus has been undergoing alow oxidation.

PALLISER'S CHILLED SHOT. see Cannon

PALL MALL, a street near St. James's palace, London, is named from a French game at ball (paille-maille, being a wooden mallet), resembling the modern croquet, having been played there about 1621. Among eminent inhabitants were Nell Gwyn and Dr. Thomas Sydenham. The PALL MALL GAZETTE, a daily independent political and literary journal, first appeared 7 Feb. 1865, and was edited by Mr. Frederick Greenwood till I May, 1880, when it became a liberal paper, edited by Mr. John Morley, who retired 25 Aug. 1883. Price 2d. reduced to 1d. 2 Jan. 1882.

Nos. 6, 7, 8, 9 July, 1885, contained Mr. Stead's statements respecting offences against young women and children. Greatly disproved on investigation. See

Political pamphlets began in Edward VI's time. and were very numerous in the 17th and 18th centuries (by De Foe, Swift, Steele, and others).

PARISHES. Their boundaries in England were first fixed by Honorius, archbishop of Canterbury, 636. They were enlarged, and the number of parishes was consequently reduced in the 15th century, when there were 10,000. Parish registers were commenced in 1538. Acts were passed in 1844 and 1856 by which new parishes may be formed out of too extensive ones; acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See Registers, and Benefices.

PARKESINE. A new substance, composed of gun-cotton, obtained from various vegetable bodies, and oil. It can be formed with the properties of ivory, tortoiseshell, wood, india-rubber, gutta-percha, &c. It is the invention of Mr. Alexander Parkes, of Birmingham, and was shown by him at the Exhibition in 1862. In Dec. 1865, at the Society of Arts, parkesine was proved to be an excellent electric insulator, and therefore likely to be suitable for telegraphic purposes.

#### PARK LANE MURDER, see Trials, 1872.

PARKS. The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made was that of Woodstock, formed by Henry I., 1125. Queen Caroline, consort of George II., inquired, it is said, of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. See Finsbury, Southwark, Green, Hyde, James's, St., Regent's, Victoria, Alexandra, Battersea, and People's Parks, and Yellowstone Park, U.S., and London Parks Act.

PARLIAMENT (from the French parlement, discourse) derives its origin from the Saxon general assemblies, called Wittenagemot. The name was applied to the assemblies of the state under Louis VII. of France, about the middle of the 12th century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw. I., 1272: and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaker (1592), that this name was used even in the time of Edward the Confessor, 1041. The first clear account we have of the representatives of the people forming a house of commons, was in the 43rd Hen. III. 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons were to be held yearly. Burton's Annals. The general representation by knights, citizens, and burgesses, took place 49 Hen. III. 1265. Dugdale's Summons to Parliament, edit. 1685; see Commons and Lords. The power and jurisdiction of parlament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII. and William III.). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. Sir Edward Coke.* The ninth edition of May's "Practical Treatise on Parliament" was published in 1883; see Triennial and Septennial. Return of in 1005; see Irrennut and Septemus. Return of the names of members of parliament from the earliest period to the present time, ordered by the house of commons, 4 May, 1876, and 9 March, 1877. Part I. (1213-1702), published 1879. PATRONAGE of LIVINGS by Laymen in England is very ancient; in Scotland was opposed by the books of discipline 1560 and 1578, abolished 1649, restored 1660. The system led to the discuption of the established church, and the foundation of the free church, 18 May, 1843. The abolition of lay patronage was earnestly advocated by the authorities of the established church in March, 1870, and the duke of Argyll volunteered to resign his patronage in May. Of 1109 livings 319 belonged to the crown, and about 600 to private persons. An act (37 & 38 Vict. c. 82) for abolishing patronage in Scotland, brought in by the duke of Richmond, 18 May, passed, 7 Aug. 1874.

PAUL'S CROSS, ST. (London), which stood at the north side of the cathedral, was a rulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesias-tical discourses, &c. The cross was demolished in 1643, by order of the parliament.

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavoment in many of their streets; the Appian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825. Wood and asphalte paving were tried in 1839, and have been disused since 1847; see Wood Pavement. Asphalte has been much used since 1869. Wood reported to be the best for London, May, 1876.

PAVIA (N. Italy), the ancient Ticinum or Papia. Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths: in 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a rejublic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, Tout set perdu, madame, fore l'honneur (All is lost, madam, except honour). The words are now said to have been, L'honneur et la vie qui est saulvé.

PAWNBROKING. The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed monti di pietd (which see). Soon afterwards, it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; the number is increasing more than in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a halfpenny for every ticket describing things pledged for a sum under 5s. The acts relating to pawnbrokers were amended in 1856, 1859, 1860. Pawnbrokers in Great Britain; 1851, 1873; in 1861, 2578; in 1871, 3340. The law was consolidated in the pawnbrokers act passed 10 Aug. 1872.

PHILIPPI (Macedonia), so named by Philip II. of Macedon. Here Octavius Cæsar and Marc Antony, in two battles, defeated the republican forces of Cassius and Brutus, who both committed suicide, Oct. 42 B.C. Paul preached here, A.D. 48, and wrote an epistle to the converts, 64.

PHILIPPICS, the term applied to the orations of Demosthenes against Philip II. of Macedon, 352-341 B.C., and also to the orations of Cicero against Marc Antony (one of which, called divineby Juvenal, cost Cicero his life), 44-43 B.C.

PHILIPPINE ISLES (in the Malay Archipelago), discovered by Magellan, in March, 1521, who here lost his life in a skirmish. They were taken possession of in 1565 by a fleet from Mexico, which first stopped at the island of Zeba, and subdued it. In 1570 a settlement was effected at the mouth of the Manilla river, and Manilla became the capital of the Spanish possessions in the Philippines; see Manilla and Earthquakes. The Philippine commercial company was unsuccessful, 1785. A successful Philippine exhibition was opened in Madrid, autumn 1887.

PHILIPPIUM, a metal of the yttrium series, found in Samarskite earth (in Russia, North Carolina, &c.) by M. Marc Delafontaine, by means of the spectroscope; announced Oct. 1878. Also said to have been found by Mr. Lawrence Smith, and named Mosandrium, July, 1878.

PHILISTINES, a people of Palestine, conquered Israel, 1156 B.C., and ruled it forty years. They were defeated by Samuel, 1120; and by Saul and Jonathan, 1087. They again invaded Israel about 1063, when David slew their champion, Goliath. After David became king he thoroughly subdued them, rody. In common with Syria their country was subjugated by the Romans, under Pompey, about 63.—In Germany, about 1830, Heine and the liberal party applied the term "Philistines" to the opponents of progress, or conservative party.

In England the term has been applied to the opponents of "culture" and refluement, chiefly 1867 et seq.

PHILOBIBLION SOCIETY, was instituted in 1853 by Mr. R. Monckton Milnes (aft. lord Houghton), M. Sylvain Van de Weyer, the Belgian minister, and others. It publishes volumes of "Miscellanies," &c.

PHILOSOPHY (love of wisdom), the knowledge of the reason of things (distinguished from history, the knowledge of facts, and from mathematics, the knowledge of the quantity of things)—the hypothesis or system upon which natural effects are Locke. Pythagoras first adopted the explained. name of philosopher (such men having been previously called sages) about 528 B.C. Philosophers were expelled from Rome, and their schools suppressed, by Domitian, A.D. 83. Philosophy is now divided into:—I. Moral or Ethical; 2. Intellectual; 3. Natural or Physical.

PHONOGRAPHY (from the Greek phone, sound), suggested by Franklin, 1768. The Phonetic society, whose object was to render our mode of writing and printing more consonant to sound, was established, I March, 1843; sir W. C. Trevelyan, president, and Mr. Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837. Among other works published by the promoters of the system, was the "Phonetic News," in 1849; see Visible Speech.

PHOSPHORESCENCE. The property possessed by some bodies of retaining luminosity after exposure to light observed by the ancients; espe-cially noticed by Vincenzo Cascariolo (1602), Boyle, Canton, Wilson, and others; and specially studied by Edmond Becquerel, and Balmain. See Luminous Paint.

PHOSPHORUS was discovered in 1667, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunckel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. Nouv. Dict. Phosphoric acid is first mentioned in 1743, but is said to phoric acid is first mentioned in 1743, out is said we have been known earlier. Gahn pointed out its existence, in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphoretted hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely ingreased since the manufacture of immensely increased since the manufacture of lucifer matches. In 1845, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele (1777), Senebier (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its Journal, 1802. Wedgwood may be regarded as the first photographer. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of

Further discoveries were made by Niepce in 1814, and sir J. Herschel in 1819.

Louis J. M. Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicephore Niepce, and worked with him till the death of the latter in 1833. The production of Daguerreotype plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Niépee's son Isidore.

In 1839 Mr. Henry Fox Talbot first published his mode in 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a negative photograph (i. e., with the light and shades reversed) from which any number of positive copies may be obtained. Celestial Photography began with professor Bond, the astronomer, of Cambridge, U.S., who exhibited a photograph of the moon in 1851. Since then, Mr. Warren de la Rue, of London, has produced excellent photographs of the moon, and other heavenly bodies, and on 18 July, 1860, photographed the solar

ecupse. By means of the gelatine dry plate, the results of the astronomical work of years is now obtained in hours. Delicate details are obtained not only of comets, nebulæ and faint stars, but also of stars invisible by the most powerful telescopes. Since 1876, Dr. W. Huggins and Mr. Andrew A. Common in England, and Mr. Draper in America, have been eminently successful in celestial photography. About 400 stars have been depicted in the space of two square inches.

PROTOGALVANOGRAPHY, the art of producing engravings by the action of light and electricity. The carliest specimens were produced by Nicéphore Niépce, and presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niépce de St. Victor (who published a treatise on it in 1856), Vitry, W. R. Grove, H. Fox Talbot, &c. In 1852, Paul Pretsch patented a process which he called "Photogalvanography."

PHYSIC appears to have been first practised by the Egyptian priests. Pythagoras endeavoured to explain the philosophy of disease and the action of medicine, about 529 B.C. Hippocrates, the father of medicine, flourished about 422 B.C., and Galen. born A.D. 131, was the oracle of medical science.

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by sir Hans Sloane, was given to the Apothecaries' company in 1721; this last was very much admired by the illustrious Linnsus.

PHYSICAL SOCIETY, established 14 Feb. 1874; Dr. J. H. Gladstone, first president.

PHYSICIANS, ROYAL COLLEGE OF, of London (of England since 1858), was projected by Dr. Linacre, physician to Henry VIII., who through his interest with cardinal Wolsey, obtained letters patent, constituting a corporate body of regular physicians in London, with peculiar privileges, 23 Sept. 1518. Linacre was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built elibrary and public hell which he granted for ever a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by sir C. Wren, where it continued till 1825, when the present elegant stone edifice in Trafalgar-square was erected from designs by sir R. Smirke.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, 29 Nov. 1681.

PHYSICS, see under Philosophy.

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the last century; the essays of Le Cat and Pernethy led to the modern system. Lavater's researches in the pursuit arose from his having been struck with the singular countenance of a soldier who passed under a window at which he and Zimmerman were standing; his "Fragment" on this subject appeared in 1776.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, Huxley, and Carpenter are much celebrated, and Todd's "Cyclopædia of Physiology" (1836-59) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson and others, early in 1876; see Royal Institution.

PIANOFORTE. * The invention is attributed to Cristofalli (or Cristofori), an Italian, J. C. Schröter, a German, and Marius, a Frenchman, early in the 18th century. The strings are struck by small hammers, and not by quills, as in harpsichords. Schröter is said to have presented a model of his invention to the court of Saxony, in 1717; and G. Silberman manufactured pianofortes with considerable success in 1772. Pianofortes were made in London by M. Zumpie, a German, 1766, and have been since greatly improved by Clementi Broadwood, Collard, Kirkman, Erard, Pleyel, and

PLANIMETER, a machine for measuring the area of any figure by the passage of a tracer round about its perimeter. Amster's planimeter (in use for several years) was described at the British Association meeting at Brighton, Aug. 1872.

PLANING-MACHINE. One for wood was constructed by Bramab, about 1802; and one for iron by Joseph Clement in 1825.

PLANTAGENET, * HOUSE OF, to which belonged fourteen English kings, from Henry II. 1154, to Richard III. killed at the battle of Bosworth, 1485; see England, Kings.

#### PLANTATIONS, see Trade.

PLASSEY, in Bengal, India, the site of a battle fought between the British under Clive, and the Hindoos under Surajah Dowlah, 23 June, 1757. The nabob, although at the head of about 68,000 men, was vanquished by 1000 British and about 2000 sepoys. The victory laid the foundation of our empire in India; see *India*.

PLASTER OF PARIS. Gypsum, sulphate of lime, used for moulds, statuary, &c., first found at

Montmartre, near Paris, whence its name. method of taking likenesses by its use was first discovered by Andrea del Verrochio, about 1466.

PLATA, LA, see Argentine Republic.

PLATEA (Bootia, N. Greece), site of the battle between Mardonius, commander of the army of Xerxes of Persia, and Pausanias, commander of the Lacedemonians and Athenians, 22 Sept. 479 B.C.; the same day as the battle of Mycale. Of 300,000 Persians scarce 3000 escaped with their lives. The Grecian army, about 110,000, lost but few men. The Greeks obtained immense plunder, and were henceforth delivered from the fear of Persian invasions. Platæa, as an ally of Athens, was destroyed by the Thebans, 372; and rebuilt by Philip II. after his victory at Chæronea, 338.

PLATE. In England, plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. (1606). The celebrated Plate act passed in May, 1756. This act was repealed in 1780. The act laying a stamp-duty upon plate passed in 1784; see Goldsmiths' Company. By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a lower standard; but a later act excepted marriage rings.—The art of covering baser metals with a thin plate of silver, either for use or for ornament (PLATING), said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger and the iron thicker, till at last he merely coated the iron spur with silver; see *Electrotype*.

Mr. Wilfred Joseph Cripps' "Old English Plate," a valuable work, containing the researches of Mr. O. Morgan, published, 1878. His "Old French Plate," 1880. Dutyon silver plate to be reduced gradually till abolished,

from I June, 1881.

PLATE-WAYS, on ordinary roads for waggons carrying goods, proposed at Liverpool about 1880, to supersede railways for cheapness; not adopted, Jan. 1883.

PLATINUM, the heaviest of all the metals, cept iridium. The name originated with the except iridium. Spaniards on account of its silvery colour; Plata signifying silver. It was found in the auriferous sand of the river Pinto, in South America, and was unknown in Europe until 1741, when don Antonio Ulloa announced its existence in the narrative of his voyage to Peru. Greig. In its ore have been found the metals palladium, rhodium, osmium, iridium, and ruthenium (which see). In 1850, M. H. Ste.-Claire Deville made known a new method of obtaining platinum from its ore, in great abundance and purity; and at the international exhibition of 1862 was shown a mass worth 3840%, weighing 2661 lb., of a metal hitherto considered infusible, obtained by his process, employing the oxy-hydrogen flame. See Philosophical Lamp.

Dode's process for coating iron with platinum to prevent rust, shown at Johnson & Matthey's, 11 Jan. 1879.

PLATONIC PHILOSOPHY, the most popular of all systems (see *Philosophy*). Plato's dialogues have been termed "Philosophy backed by example." He was a disciple of Socrates, 409 B.C., and died 347. The leading feature of his mind was comprehensiveness.

PLATONIC YEAR, the period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or

^{*} Fulke Martel, earl of Anjou, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in atonement for the murder, to Jerusalem, attended by only two ment for the murder, to Jerusalem, attended by only two servants, one of whom was to lead him by a halter to the Holy Sepulchre, the other to strip and whip him there, like a common malefactor. Broom, in French genet, in Latin genista, being the only tough, pliant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called Planta-genista, or Plantagenet; other accounts are given. Skinner and Mézéray.

period requires 25,816 common years to complete it; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

PLATTSBURG. A British expedition against this place, a town of New York, on Lake Champlain, was designed under general sir George Prevost, but was abandoned after the naval force of England had suffered a defeat in an engagement with the Americans, II Sept. 1814, when the British squadron in Lake Champlain was captured; see United States.

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquis of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme was not successful.

The Metropolitan Public Garden, Boulevard, and Playground association formed by lord Brabazon (aft. earl of Meath) and others in 1882 has done good service in the east of London.

PLAYS, see Drama and Theatres.

PLEADINGS. Clothaire held a kind of movable parliament called placita whence came the word pleas, A.D. 616. Hénault. In the early courts of judicature in England, pleadings were made in the Saxon language in 786; and in Norman-French from the period of the conquest in 1066 until 1362. Pleadings were ordered to be in English by 36 Edward III. 1362, and Cromwell extended the rule to all legal proceedings 1650. In English law the proceedings are the mutual statements of the plaintiff's cause of action, and the defendant's ground of defence.

PLEBEIANS, Plebes, the citizens of Rome, as distinguished from the Patricians; see Rome, 494-366 B.C.

PLEBISCITUM, a term given to a law passed by the comitia tributa, an assembly of the Roman people in their tribes, first established in 491 B.C. The term has been recently revived in France and Italy, and applied to Universal Suffrage (which see).

PLETHYSMOGRAPH, an apparatus for detecting the state of the mind by observing the relations of the circulation of the blood from the heart to the brain, invented by M. Mossol, of Turin, 1882.

PLEVNA, Bulgaria, 27 miles N.N.W. of Nicopolis; near the river Vid; the site of very fierce conflicts during the Russo-Turkish war, 1877.

PLOUGH. "Thou shalt not plough with an ox and an ass together." Deut. xxii. 10 (1451 B.C.). The Roman plough is minutely described by Virgil, about 31 B.C. Engines to plough grounds, whether inland or upland, were patented by David Ramsay and Thomas Wildgoose, in 1618; and many improvements in ploughs have been patented since. The application of steam power to ploughing was patented by John Upton in 1837, and by others since, more especially by lord Willoughby D'Rresby, the marquis of Tweeddale, and the earl of Caithness; see Steam-Plough.

International trial of ploughs, &c. at Haarlem: prizes won by English makers (Howards, Ransumes, &c.), 17-19 Sept. 1879.

PLOUGH MONDAY, in January, the first Monday after the Epiphany. It received the appellation from its having been fixed upon by our forestathers as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. Ashs. On Plough Monday, too, the ploughmen of the north country used to draw a plough from door to door and beg plough money to drink. Bailey.

PLUM. We have two native plums; our finer kinds came from Italy and Flanders about 1522. The Diospyros Lotus, the date plum, was brought from Barbary, before 1596; the Pishamin plums, Diospyros virginiana, from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as raisins do to this day.

PLUMBAGO, see Graphite.

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes; the first being 21 Henry VIII. 1529. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850, 1855, and 1885, provisions being made for the amalganiztion of neighbouring benefices.

PLYMOUTH, a fortified scaport in Devonshire, originally Sutton, was incorporated as Plymouth in 1439. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish armada. The fine hotel and assembly-rooms were burnt 6 Jan. 1863; loss about 50,000. The National Association for Social Science met here, Sept. 1872. See Armada, 1888, Breakvater, Dock-yards, and Population.

appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as his vicar. Their doc-trines agree with those of most evangelical pro-testant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

In 1862 tubes were laid down from the Euston railway station to the N. W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons travelled in them. Engineer, Mr. Rammell. The company stopped through insufficient support, 1876. A pneumatic tube by Siemens, employed to transmit telegraphic messages, began about Jan. 1871.

to whom an annual stipend was first paid of one hundred shillings.

Chaucer, on his return from abroad, assumed the title of poet-laureat; and in the twelfth year of Richard II., 1389, he obtained a grant of an annual allowance of wine. In the reign of Edward IV., John Kay was laureat. Andrew Bernard was laureat, temp. Henry VIII.; and John Skelton, temp. Henry VIII.

James I. in 1615, granted to his laureat a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 1001, per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly. Laurence Eusden commenced a series of Birth-Day and

Pye, in 1813.

On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."

POICTIERS (W. France), near which was fought the battle between Edward the Black Prince and John, king of France, in which the English arms triumphed, 19 Sept. 1356. The standard of France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London; see Towrs, and Vouglé.

POISONING. A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531; see Boiling to death. The Henry VIII. 1531; see Boiling to death. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy act of 1868. Additional restrictions enacted by act passed in 1885. The Poisoned Grain Prohibition Act was passed 28 July, 1863.

A deadly poison freely administered by Italians in the seventeenth century, was called aqua tofuna, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was through the formant and many find and same was thrown into a ferment, and many fied, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallised arsenic. was thrown into a ferment, and many fled, and some

He wrested a pole-axe from one of the murderers, and soon laid four of their number dead at his feet, but was at length over-powered and slain. The shaft is flut... and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. use, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One suppose the edifice was dedicated to Vespasian, another tiseverus; and Mr. Clarke, from a half-effaced inscription on the base, considered that Adrian is the person honoured; while many assent, from the same inscription, that it is dedicated "to Diocletian Augustus, most adorable emperor, tutelar detty of Alexandria."

Glowing prospectuses were issued in Frafice, a company was formed, and, the scheme being favoured by the legitimists, a large number of shares were purchased and much money received. Other speculating companies were formed, and colonial government officers nominated. In spite of warning and prohibition several vessels sailed in 1870 with emigrants to meet with misery, disease, and, to a large extent, with death. A few who had been landed in New Caledonia got back to France and published an account of their sufferings. The marquis and some of his associates were brought to trial 27 Nov. of his associates were brought to trial 27 Nov. 1883; he was sentenced to four years imprisonment and a fine of 3000 francs; his associates to shorter imprisonment, 2 Jan. 1884; on appeal, sentence confirmed, 14 March, 1884.

PORT EGMONT, a fine harbour on the N.W. coast of Falkland Islands. Commodore Byron was despatched to found a colony here in 1765; see Falkland Islands.

PORTE, or SUBLIME PORTE, official name of the court of the sultan of Turkey. Mostasem, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. -Bouillet.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people, at night, broke open the prison, took out Porteous, and hanged him on a dyer's sign-post, in the Grass-market, 7 Sept. 1736. None of the rioters were ever detected.

PORTER. Dr. Ashe says that this beverage obtained its appellation on account of its having been drunk by porters in the city of London, about 1730. The number of licensed brewers in 1850, in England, was 2257; in Scotland, 154; and in Ireland, 96—total, 2507. On 17 Oct. 1814, at Meux's brewhouse two large vats of porter burst, destroy-ing neighbouring houses. Several lives were lost; and the loss was between 8000 and 0000 barrels.

PORTLAND CEMENT, first mentioned in a patent granted to Joseph Aspden, a bricklayer of Leeds, 1824. His son made the true cement at Northfleet. Its value as a building material was established by Mr. John Grant's tests, 1859-71.

^{*} The malt liquors previously in use were ale, beer, * The mait liquors previously in use were ale, beer, and twopenny, and it was customary to call for a pint or tankard of half-and-half,—i.e., half of ale, and half of beer. In the course of time it also became the practice to ask for a pint of three-thirds, meaning a third of ale, beer, and twopenny. To avoid trouble, Harwood, a brewer, made a liquor which partook of the united flavours of ale, beer, and twopenny, calling it entire, or entire but beer, meaning that it was drawn entirely from one cask or butt. Being relished by porters and other working people, it obtained its name of porter, and was first retailed at the "Blue Last," Curtain-road.—Letok. -Leigh.

^{*} Born 1738; became lord chamberlain, 1765; lard lieutenant of Ireland, 1783; premier, 1783; home serve tary, 1794; lord president, 1801; premier again, 1807; died, 1809; when Mr. Spencer Perceval became premier.

Portland cement concrete was used by Mr. E. A. Bernay in 1867.

PORTLAND ISLE (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between the English and Dutch, 18 Feb. 1653, which con-tinued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug. 1872. Mr. James Rendel, the first chief engineer, was succeeded on his death in 1856 by Mr. (aft. sir) John Coode. The breakwater and other harbour works cost 1,033,600%. exclusive of convict labour. The Portland prison was established in 1848. A mutiny among the convicts here in Sept. 1858, was promptly suppressed.

PORTLAND (or BARBERINI) VASE. This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it in white enamel; height 10 inches; diameter in the broadest part, 7; with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 21 miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (222-235), and his mother Mammæa, and the vase is supposed to have been the cinerary urn of one of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland, 1787; at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British Museum. On 27 Ech 1826 this was was smashed to pieces with 27 Feb. 1845, this vase was smashed to pieces with a stone by a man named William Lloyd; it has been skilfully repaired, and is now shown to the public in a special room. Josiah Wedgwood made a mould of it, and took a number of casts.

PORT ROYAL (N. America), capital of the French colony, Acadie, founded in 1604; after having been taken and restored several times, it was finally acquired by the British in 1710, and named Annapolis.

PORT ROYAL (Jamaica), once a considerable town, was destroyed by earthquakes in 1602 and 1602; laid in sahes by fire in 1702: reduced to ruins by an inundation of the sea in 1722; and destroyed by a hurricane in 1774. After these calamities, the custom-house and public offices were removed to Kingston. Port Royal was again greatly damaged by fire in 1750; by another awful storm in 1784; and by a devastating fire in July, 1815; in 1850 it suffered by cholera.

PORT ROYAL DES CHAMPS (near Paris) was a French Cistercian convent, founded by Odo, bishop of Paris, at the wish of king Philip Augustus, 1204. Having fallen into decay, it was revived and reformed in 1608 by Angelica Arnauld. In 1625 the increased community removed to Paris. The Port Royal des Champs, in 1656, became the retreat of the Arnaulds, Tillemont, Pascal, Lancelot, and other eminent Jansenists, who devoted themselves to education, and produced the Port Royal grammars, logic, and other works. This institution was condemned by the pope in 1709, and the buildings were pulled down, and tombs desecrated, by the order of Louis XIV., in 1710. The Port Royal at Paris was suppressed, with other monasteries, in 1790.

PORTUGAL.  PORTUGAL, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of Oporto. After a nine years' struggle, under Viriathes, a brave able leader, the Lusitanians submitted to the Roman arms about 137 B.C. Portugal underwent the same changes as Spain on the fall of the Roman empire. There are in Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded in 1533. Lisbon has also its royal academy, and the small town of Thomar has an academy of sciences, but, in general, literature is at a low ebb in Portugal. The poet Camoens, called the Virgil of his country, and author of the Lusica (1569), translated into English by Mickle, was a native of Lisbon.
